Naval Academy Chemist Discusses Drugs, Organics

Two emergencies arose this weekend for Dr. Calvin Vanderwerf, President of Hope College, causing him to cancel his visit to St. Andrews for at least a week.

As his replacement, Dr. Delta W. Gier located Dr. Samuel P. Massie, Professor of Chemistry at the U.S. Naval Academy. Dr. Massie left his midshipmen Tuesday and arrived on campus about 5 p.m. the same day. That evening he entertained the students with a lecture entitled "Will the Key Fit the Lock?" He discussed drugs and the research that is going on in that field, especially the "pill".

Wednesday morning Dr. Massie reviewed the Chemistry 2-3 class of the basic concepts of organic chemistry. Later on that morning he spoke to Senior C&C students.

Dr. Massie briefly explained his course of instruction at Annapolis, stating that the midshipmen took five courses a semester of which 34 were common to all males on campus. Each student then can choose six courses to advance his knowledge in his special field of interest. He noted that the size of classes at the Academy is smaller than St. Andrews, less than 20 students. In addition, the instructor is responsible for the lecture as well as his labs. He also said that the

number of chemistry professors at the Academy, 32, far outnumbers the six that St. Andrews has.

Expanding on his philosophy of "the College", Dr. Massie explained that a college must teach more than the common three R's. A good curriculum stresses three more R's; Reason, Respect, and Responsibility. The purpose of education is "not to make carpenters out of men, but to make men out of carpenters."

St. Andrews, as a small college, has a "great opportunity at the time in a world in which there is so much progress. It can best meet this challenge by permitting its students to challenge the future while keeping hold of the past," explained Massie.

He reminded us that "students must never lose sight of the fact that before they can become a lawyer, engineer, or a housewife, they are first a man or woman. Therefore, if the student is to be a good engineer, lawyer, or a housewife, they must first be a good man or woman."

Sommerville Presents Recital, Soprano Voices on Monday

Virginia Somerville, soprano, will be presented in faculty recital Monday, October 30 at 8:00 p.m. in the Liberal Arts Auditorium at St. Andrews Presbyterian College. Mrs. Somerville is a member of the St. Andrews School of Music voice faculty and a student of Radiana Pazmor.

Born in Northwestern Illinois, Mrs. Somerville holds the B. M. degree from the University of Dubuque, Dubuque, Iowa, and the M. M. degree from Chicago Musical College of Roosevelt University, where she studied voice with Harvey Ringel. She has taught

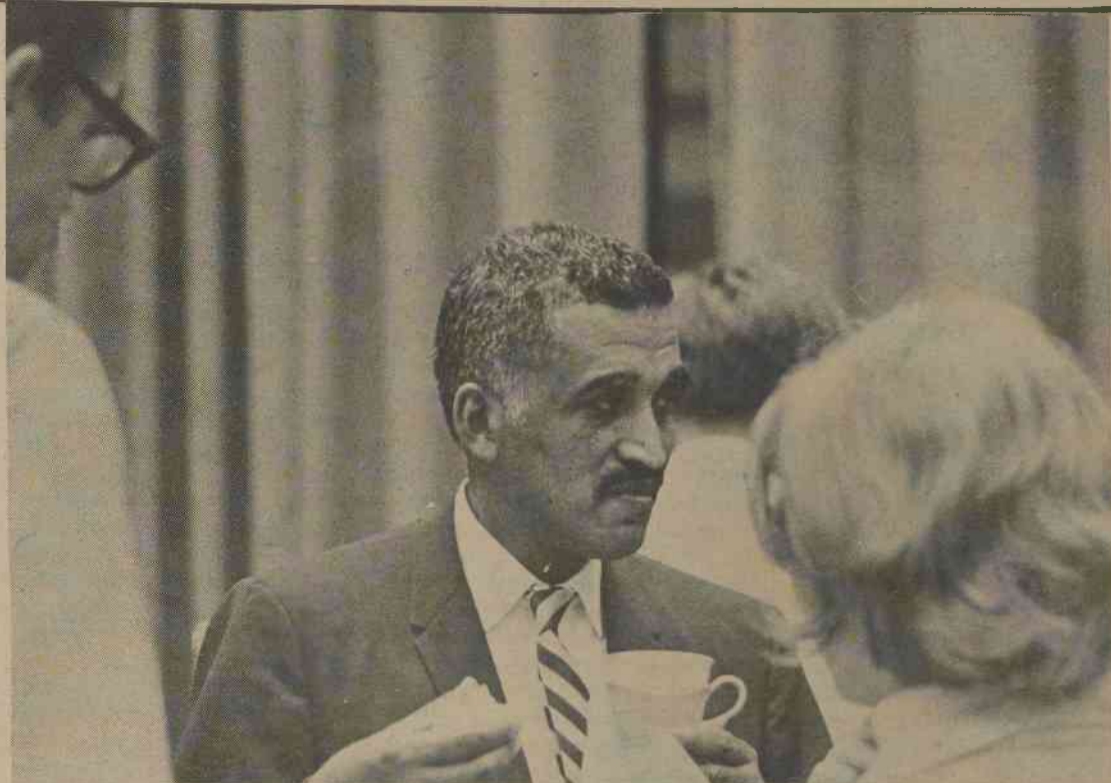

voice and directed choirs in Iowa, Puerto Rico, and Chicago, and from 1962 to 1965 was a member of the Chicago Symphony Orchestra Chorus. Mrs. Somerville became a Laurinburg resident in the fall of 1965, and was appointed to the St. Andrews faculty one year later. She has been the recipient of many awards and honors, including "Who's Who in American Colleges and Universities" and various music scholarships and grants.

Mrs. Somerville has performed throughout the midwest, and was selected to represent her graduating class of Chicago Musical College with a performance in Orchestra Hall. Her previous recitals on the St. Andrews School of Music series have included a presentation of Menotti's THE TELEPHONE with her husband, also a member of our faculty.

The soprano's recital Monday night will begin with an aria by G. F. Handel and "The Blessed Virgin's Expostulation" by Henry Purcell. Four French songs by Faure and Debussy and an aria from Rossini's "The Barber of Seville" will conclude the first half of the program.

Following intermission, Mrs. Somerville will sing Robert Schumann's song cycle, "Frauenliebe und Leben" (The Life and love of Woman). The recital will end with four songs by 20th century composers Roger Quilter, Samuel Barber and Ned Rorem.

Mrs. Somerville will be assisted by Phillip Clarke of the St. Andrews School of Music piano faculty. A reception for the artists will be held in the Liberal Arts Building foyer immediately following the recital. The public is invited.

The "pill" and drugs in general was Dr. Sam Massie's topic when he addressed the campus on Tuesday night.

Gross Conveys New Draft Laws

Tonight on radio station WSAP, Mr. Ed Gross, registrar of the college, will discuss the draft, placing emphasis upon the new additions to the draft

laws.

There are four regulations that must be met by any undergraduate if he is to be considered for 2-S classification. He must REQUEST deferment, must be currently pursuing a course of instruction that involves at least 12 hours, must be less than 24 years of age and must have completed a specified percentage of degree requirements each year. The last regulation is new and important.

No longer is a student's grade ratio important. What the last regulation means is that the student must have earned at least 25% of the credits required at the end of his sophomore year and so on.

Yet all hope is not lost if a student does not have the required percentage. There is some leeway, according to Gross. If a student needs 30 hours at the end of his freshman year, then he is safe if he only has 28 or 29 hours.

Another change is that a student's academic year is now considered on a 12 month basis. This allows the student 12 months to complete his 25%.

If a student does not meet the criteria for a II-S classification, he may qualify for I-S (C). First, however, he will receive a physical, then be classified I-A and finally receive his induction notice. At this point he can protest and say that he is a full-time student. The draft board will then reclassify him as I-S (C). However no student may be classified as I-S (C) more than once.

State Program

This week a committee representing the North Carolina State Department was on campus to examine the progress of the teacher education program at St. Andrews.

The college hopes to be granted approval of the new five year teacher education program.

The juniors are now in the midst of the brief teaching program. This project requires 20 hours this semester of observing and brief teaching for prospective teachers.

Gross said.

There have been significant changes in the laws concerning graduate school. Anyone who enters graduate school after October 1, 1967 is draft bait unless pursuing studies in medicine, dentistry, veterinary medicine, osteopathy or optometry, or a course of study designated to be in national interest, which there are none at the present.

Mr. Gross said any student who does not fill out a request for the college will not be reported to his draft board under any circumstances. However, he warned against this policy because if one does not ask for the college's help, then the board does not know that he is in school. Obviously, this will lead to unnecessary complications.

Sen. Seth Tillman Addresses Campus

Member of the Senate Committee on Foreign Relations, Seth Tillman will be on campus for several engagements today. He will speak in Senior C&C on the Role of Congress or The Lack of It in the commitment of the U. S. in Foreign Wars.

Friday afternoon at 3 p.m. Senator Tillman will give a public lecture on The Role of Congress in Foreign Policy.

Seth Tillman, who now lives in Washington, is an alumnus of Syracuse University's Fletcher School of Law Diplomacy. At Fletcher he was a member of Pi Alpha Chi of Theta Alpha.

He has been awarded numerous awards including lecturer in European Diplomacy at Johns Hopkins University School of Advanced International Studies.

As an author he has written "Anglo-American Relations at the Paris Peace Conference in 1919". Tillman is a member of the American Political Science Association.

In 1960-61 he was a Congressional Fellow in the office of Rep. Lindsay and Senator Fulbright.

Educator to Speak

Doctor Sam Proctor will address the Junior and Senior C&C programs on the 1st of November. His topic for C&C 302 will be "Urbanization and The Negro". "Can America Survive Unless the Urban Problem is Solved" will be his topic for the seniors.

Proctor is the author of "The Young Negro in America 1960-1980", published by the Association Press, 1966.

Dr. G. Tyler Miller, Assistant Dean of the College for Instruction, attended the Conference on Science and Religion last week. Drs. Al Wells, Doubles, Wetmore, Mr. Ludlow and Mr. Miller attended this conference at North Carolina State University at Raleigh. Dr. Miller also spent three days at Hope College as a consultant for the Science Curriculum Conference.
