

Familiar Face Has New Position

by Ann Boone

St. Andrews is welcoming a new Vice-President and Dean of the College this year. His face is not a new one here, but present positioning is. George Melton was, prior to this year, very active in the role of Professor of History. He will be serving on an interim basis as Dean for the 1984-85 school year. His selection to this position was made by the President of St. Andrews and a special committee of Faculty Executive Committee.

Because of his love for teaching and his students, Dean Melton will continue to teach one course, Age of the Second World War. When his interim is over, he plans to continue teaching.

According to Dean Melton, no revolutionary plans or changes are in the works, but he wants to build upon the foundation erected by former Dean Crossley. He will be striving to set directions for his successor to continue on so he or she will not have to start from scratch. Our new Dean wants it to be known that he wishes to be responsive to the needs of both faculty and students. People are to feel free to go by his office and present any pertinent needs.

by Lynn Okan

Despite what many students believe teachers are human too. Many professors at St. Andrews had very unusual, interesting, and creative summers.

Norman Melvin spent his summer cataloguing plants of several South Carolina counties. One-hundred different species were found, two of them had never been recorded in the state. For personal interest he has catalogued approximately 225 species of plants that have never been recorded in Scotland County!

Many professors took to the road and the sky during summer vacation. One of the most unique trips was made by David Wetmore and his son Dan. They took a nine and a half day trip from Murphy to Manteo. What is unique about this? The trip was done on bicycles. Once completed the journey covered 700 miles. A rather exten-

sive and envious trip was made by Leon Applegate. He spent three weeks sightseeing All over Europe. A few of the places he visited were Monte Carlo, Paris, Barcelona, Nuremberg, and Amsterdam. Applegate also spent his days restoring a 68' cougar. Professor Lindquist made a cross country

New Program Takes Action

by Brigitte Tomasovic

The work-study program has had an increase in the number of students who qualify for this type of financial aid. To accommodate the needs of increase several new departments were added as campus jobs; some of them included photography, stable hands, and housekeepers. There has also been an increase in the number of students working in the other established departments as well.

The department in which the most change will be observed in is the housekeeping. The maids of the past have been replaced by approximately 60 Freshman custodian workers. They will be accountable to five area supervisors. The entire program is then overseen by Ed Godwin. The housekeepers will be responsible for the upkeep of all buildings on campus. The workers will average 12 hour work weeks. They also have several benefits. The first of which is the pay of \$3.50 an hour, the highest paid work-study job. Second is the jobs are usually performed in the late afternoon or early morning. The third benefit is the program is project oriented. This means that the housekeeper is allotted a certain

voyage. He came from Belingham, which is as far as any one can go on the continent, ending here in Laurinburg. While many of us were basking in the sun or at least thinking about it, Dr. Lindquist was able to play in the snow in the Olympic Mountains! Peggy Johnson made her way west this summer. While on her trip she was able to meet her new nephew and see her 94 year grandmother. Russell Hauver spent a week and a half in Kentucky camping; while there he was able to see President Reagan. Professor Goodwin was able to stick his big toe in the ocean while in Maine. While in Maine he attended a conference to help him with the internationalizing of school curriculums. He also attended conference on a consumer economic update for educators. Lawrence E. Schultz made a excursion westward. He went to a family reunion in California;
