

# Braves Drop Last Game

Trailing 22-0 early in the second quarter, Chowan College quarterback Martin Page staggered Nassau Community College with four-straight touchdown passes but the Lions bounced off the ropes with the next three scores and a 43-35 Coastal Conference victory here Saturday afternoon, Nov. 10.

The setting for the free-scoring game was Hofstra University Stadium which features Astro Turf. The teams had to contend with a freezing wind that whipped through the 7,500-seat stadium.

Nassau opened the scoring with a 16-yard field goal mid-way in the first period and quickly added three scores on runs of four and one yards by running back David VanNostrand and five yards by his replacement, Victor Kelly for a 22-0 lead.

But Page started his magic, all the more remarkable considering everyone in the stadium had numb hands. Flanker Don Estes played a big role in the first three scores, which came in the second quarter. Estes snagged a 30-yard pass from Page to set up the first score, a 15-yard pass to split end Connie Tripp. Running back David Page, who gained 103 yards to lead the Braves' backs, ran for two points and Chowan trailed, 22-8.

The next score followed a fumble recovery by tackle Ricky Locklear of Fairmont at Nassau's 31. Page followed with a touchdown pass to Estes and the kick by Junior Creech made it 22-15. With 28 seconds left in the half, Page uncorked the Braves'

longest scoring pass of the year, a 62-yarder to the outstretched hands of Estes and Creech kicked the extra point to lift Chowan into a 22 tie with the stunned Lions.

Page continued his mastery to start the second half tossing a 22-yard scoring pass to tight end Mark Randall. The touchdown was the first of the season for Randall, a sophomore who had won praise for his blocking and unselfish team play during the season.

The point by Creech was Chowan's last until Green raced 48 yards for the Braves' final score with three minutes left in the contest. Chowan's 29-22 lead crumbled when the Lions scored on a 16-yard pass with four minutes remaining in the third quarter and followed less than a minute later with a 34-yard interception return to snap the 29-29 tie and regain the lead, 36-29. Nassau padded its margin with a final five-yard touchdown run by VanNostrand. Green's run followed for the final 43-35 score.

Chowan ended its season with a 5-5 mark, its worst since 1968, and 3-3 conference record. Nassau evened its record at 4-4 and 2-3.

Page's four touchdown passes equaled the number he had thrown in the Braves' first nine games. Green scored his fourth TD to tie fullback Ron Raysor in that category. Tripp, a freshman from Farmville, raised his touchdown reception total to six and Estes, a sophomore from Creedmoor, to four.

On defense, sophomore Eddie Brooks of Fairmont, elevated to

starting status late in the season, again led the backs in tackling with seven individual tackles, two assists, and a fumble recovery. Linebackers Daryl Gilyard of Greensboro had a total of 18 tackles, Mike Yuhas of Minersville, Pa., 13, and Mike Marshall of Fayetteville, 12. Locklear added 10 including seven unassisted.

## Energy Briefs

**BROOMFIELD, Colo. (AP)** — After a flurry of publicity, the Colorado State Patrol has revoked a ticket for impeding traffic issued to a 70-year-old man who said he was driving slowly to conserve energy.

Jesse H. Lovin of Loveland was issued his first traffic citation this week while driving on two-lane U.S. 287 south of Longmont. He was cited for driving between 40 and 46 miles per hour in a 60 m.p.h. zone, causing nine vehicles to trail him unable to pass.

The ticket was revoked "because of the controversy at the time over the law and the appeal of the President and the governor of Colorado to reduce speeds to conserve fuel," a spokesman said.

**LAS VEGAS, Nev. (AP)** — Las Vegas' glittering strip and downtown casino center will go dark under a plan announced by the Nevada Resort Association.

The proposal announced Thursday calls for hotels and casinos to voluntarily shut down all outside signs and other exterior lighting.

Robbins Cahill, association managing director, said the plan was "agreed upon by resort people" present at a meeting Thursday and will be "recommended to all the others."

"The thought is that this was a first step to communicate to everybody that Las Vegas means business and they're going to conserve energy," he said.

**MADISON, Wis. (AP)** — Madison will use Christmas decorations that don't need electricity and shorter store hours early in the holiday season to help reduce energy consumption.

The Central Madison Committee decided Thursday that lighted street decorations will be replaced by wreaths and stores will concentrate on natural decorations such as trees.

Downtown businesses will cut back their traditional holiday hours by not opening nights until Dec. 3, it was agreed.

THE CHOWAN BRAVETTES — Left to right, front row; Sherry Sheffield, Barbara Hudson; Courtney Boggs, Debbie Miltz, Dawn Bell, Gail Paul. Second row: Vickie Stewart, Gilda Carter, Susan Bell, Shirley Gatling, Cindy Phelps, Susan Isaacs, Lunette Coburn, Windy Middleton. Professor Bob Brown is advisor to the group.

## The College Speaks Out . . .

"No, they already have too much control over everything else. This is none of their business." quoted-Susan Hicks

"It doesn't really matter, who wants to date here." quoted-Mike Maurice

"I don't think the college should have anything to say about who you date, but I definitely feel that there should be certain rules in the lounges. Without rules some people wouldn't know how to act, or really care. What they do in private is their own business." quoted-Lynn Kirsch

"Should the college have any control on your dating habits?"

"No, they put too much strain on the guys and girls. If the girls have a curfew, the guys should. It's no telling what they do after we leave." Sheran Bunch

"Yes, as far as hours go, but they should be later. There should be the same curfew for everyone." Rick Butler

"I think we should have open dorms on the weekends and the curfew should be around 1:00. The time is too limited so we can't go anywhere. Money doesn't come easy and the businesses should try to be our friends." James Matthews

"No, and there should be absolutely no curfew. The girls are more mature about coming in, anyway. There's not much to do anyway and the time is pressed." Terry Young

"No, its none of the school's business. At our age there is a sense of responsibility." Allen Bateman

**Nerve Gas**  
**WASHINGTON (AP)** — Contradicting Army Secretary Howard Callaway, a Pentagon spokesman said Thursday "there are no plans at all" for any open-air testing of nerve gas.

Callaway said Wednesday in Salt Lake City that the Army plans such tests.

But Defense Department spokesman Jerry W. Friedheim, the Pentagon's chief press spokesman, said "there is no approved plan or program within the Department of Defense or within the Department of the Army at this time for any open-air testing of open-air agents."

Callaway's remarks about plans to test nerve gas in the open air were made at a Salt Lake City news conference.

He said open-air tests are more useful than tests in restricted areas and that there are "places sufficiently isolated" to permit open-air testing.

"No, it would be a lot better place to stay, with the changing of such rules as these." quoted Mike Herrin

"No, if there is going to be a curfew, it should be for everyone." Bonnie Harrell

"No, it should be up to the individual." David Marshall

"Students should find better places to go. There should be a time limit on both boys and girls." Mrs. Barnhill

"Not directly, however such things as time should be kept in reasonable control but on the other hand some freedom is essential!" Eddie Clifton

## Many Attend Fall Parents Day Nov. 7

By BECKIE WORKMAN

Chowan College held its 1973 Fall Parent's Day on Saturday November 3. Faculty and staff members were in their offices and available for conferences with students and their parents from 10:30 a.m. to 12:00 noon. At 12:00 noon, lunch was served in the Thomas Cafeteria. Music was provided by Professor Bob Mulder at both lunch and dinner.

There was a campus wide dormitory visitation from 1:00 p.m. to 5:00 p.m. A President's Reception was held in the Faculty Lounge of the McDowell Columns from 2:00 p.m. to 3:00 p.m. An art exhibition of land-

scape art was on exhibit in the art gallery from 2:30 to 5:30 p.m.

Entertainment was provided at 3:30 in the McDowell Columns Auditorium by the Department of Fine Arts. Professor Nancy E. Robinson's drama students performed a section from the play "You're a Good Man Charlie Brown". Dr. James Chamblee directed the Chowan College Choir in a number of Christmas selections. Mr. Bob Brown, of the music department, conducted the Chowan College band in a few numbers. Dinner was served in the Thomas Cafeteria at 5:00. Entertainment for the evening was the Chowan-Wesley football game.

## Kennedy Assassination Is Recalled by Doctors

By JAMES MANGAN

**DALLAS (AP)** — Dr. Malcolm O. Perry, the surgeon who tried to save President John F. Kennedy 10 years ago, wishes now he could reclaim a few words he spoke shortly after Kennedy died.

"I was pretty naive," Perry said recently of his statement about the neck bullet wound at a tumultuous press conference at Parkland Hospital. His words have led to endless speculation about how the President was killed and whether there was more than one assassin.

In a recent interview in his office at the University of Texas Southwestern Medical School, which adjoins Parkland, Perry recalled the events of Nov. 22, 1963.

"I was in the hospital cafeteria preparing to make bedside rounds when we heard an emergency room page for Dr. Tom Shires, the chief surgeon. This was unusual, so we made a call to check. We were told that the President was being brought in. Dr. Shires was in Galveston giving a paper, so we rushed to the emergency room."

At that point, Perry said, the President was gasping as he lay on his back on a stretcher, and Dr. James Carroco, on duty in the emergency room, was inserting a tube in his throat.

"It was clear that an airway was needed," Dr. Perry recalled. "I made an incision through the bullet wound in the front of the neck and performed a tracheostomy."

The incision through the wound deformed the original bullet hole, which was about at the point where a tie is knotted. The Warren Commission, later ruling that Lee Harvey Oswald was the lone assassin, termed this an "exit wound." Oswald was positioned in a building to the rear of the Kennedy motorcade.

However, in speaking to newsmen shortly after the President had died, Perry recalled, he said the wound in the front of the neck "appeared to be an entrance wound."

"Did you say 'entrance wound?'" a reporter asked. "Yes, entrance wound," Dr. Perry said.

This latter statement appeared definitive when it was not intended to be, and has led to suspicions about why an entrance wound later became an official exit wound.

"I never had time to really

look at the wound," Perry said in the recent interview. "The procedures were automatic. I never thought about the legal aspects when I made the cut."

"Now I wish I didn't say anything," he said with a rueful smile. "I know better now. Everybody there (at the hospital) should have gotten together on a statement."

"But I still wouldn't change anything. I could only report what I saw. I just tried to answer as honestly as I could. I don't know how many bullets struck Mr. Kennedy. I don't know any more about it now than I did then."

Perry, now a full professor of surgery, avoids reading or talking about the events of Nov. 22, 1963. "I have stayed away from it," he said. "Frankly, it depresses me. I don't care to go over it. I don't read the books."

## Energy Briefs

**HOUSTON (AP)** — W.E.N. Doty, vice president of Continental Oil Co., says development of supplemental fuels from coal and oil shale could provide the equivalent of 2.5 billion barrels of oil per year.

Doty told a meeting of the Planning Executives Institute Thursday that it would take 10 to 15 years and \$45 billion before such supplemental fuels could make a meaningful contribution.

He said coal in solid, liquid and gas forms could add the equivalent of two billion barrels of oil per year — almost double the U.S. energy loss resulting from the Arab oil boycott.

Continental Oil is the parent company of Consolidation Coal Co., the country's second largest producer of coal.

## My Neighbors

"I got a theory—always leave 'em laughing..."

## Baptist Student Union Members Attend Meet

On November 2, 1973, 15 students and Chaplain Taylor attended the statewide Baptist Student Union fall convention. This convention was in the Mountains of North Carolina just 16 miles from Asheville. The weekend was composed of simulation games of BSU chapters throughout the state. Everyone was to play a particular roll in the simulation games. These rolls were not necessarily the personalities of the individuals playing the part, but it was a roll that was to be maintained through the games. The purpose of these games was to condition the students to understand others as well as themselves. This was all a part of the theme "Living the Good News".

There were lectures by Dr. Newman from Campbell College. He spoke on the relevance of Christian living in the society of today, as well, as Christianity being something that one must

take very seriously and not something that could be taken lightly. There were feedback sessions where students could ask questions or debate Dr. Newman's ideas of "Living the Good News".

The weekend was not filled with just simulations and lectures but there was also a fantastic business meeting where Robert's rules of Parliamentary procedure were not known. There was time for fun and games and exploring the mountains too. Along with meeting new faces, many familiar faces were seen also. As time brought the weekend to a close, friends found that what was so great could not last forever, but even stopping and realizing that the bonds that were made would last even after we had all parted. All of this proved to each one attending the convention that we must try to live the Good News even as we had done during the weekend.

## Scenes from "Charlie Brown"

## Want Ads

Anyone who would like to have their want ads published in the next issue of this paper please bring them by the Graphic Arts Building (McSweeney Hall) and place them in the Smoke Signals box, or give them to Barbara Putney, Belk 207, or Box 39. The following are the ones received this week. (They're free, also.)

**FOR SALE**—Car 8-track tape player with 8 speakers. Home 8-track stereo tape player. Tape, all kinds and 8-track tape box (holds 24). East Hall, Room 305.

**TYPING**—Essays, themes, reports, and the like. 50c per page. Call 398-4881.

**FOUND**—One "Goofy" watch, in front of President Whitaker's home. Contact Otis Shelton, West Hall, Room 205.

**FOR SALE**: Tapes. \$1 and \$2, good shape and play well; most are named brands, such as Alice Cooper, Rare Earth, and Three Dog Night. See West 109.

"If you reject your responsibilities, you must accept the consequences!"

## Fuel Shortage Hits Chowan

The current energy crisis is being felt in Murfreesboro and Chowan College, and much discussion has been made during the past weeks as to how energy might be conserved. Jack Hassell, Chowan's Superintendent of Buildings and Grounds, has indicated that the shortages will indeed effect all students, faculty and staff of Chowan, and his department is taking steps to conserve fuel.

Hassell stated in an interview on Friday that "we have been told by our oil suppliers that we will receive only 75 per cent of the oil furnished last year. Therefore, we have initiated a new policy concerning the buildings on campus." The new regulations are:

- 1) All heating plants in dormitories will be cut off during the day.
- 2) The heating plants in Whitaker Library and classroom buildings will be on during the day hours, but will be cut off at night.
- 3) Heating plants in dormitories will be cut on in late afternoon or early evening. If the weather is mild, the heating plants will be turned on later at night and as the weather gets colder, the plants will be turned on earlier and they will be allowed to operate longer during the day.

4) Thermostats will be set at 68 degrees, campus-wide.

The building superintendent further stated that there are many ways in which the student body can be of valuable assistance in the college's efforts to face the fuel shortage.

The following suggestions were listed:

- 1) Keep doors and windows closed.
- 2) Turn off lights when leaving the room. Remember, it takes oil to produce electricity.
- 3) Residents of Parker and Belk Halls should cut off heating units when leaving the campus for the week-end. (These two dormitories have heating and air-conditioning units for each room.)
- 4) Wear a sweater in the classrooms and dormitories.
- 5) Do not tamper with thermostats as the result of a broken thermostat will be over-heating, or no heat at all.

Hassell was optimistic that the fuel shortage can be met with little or no discomfort to anyone on campus, but he stated, "it will take the efforts of all of us to conserve fuel and energy in every way possible."
