

POIYTIN' AROUND

by Omar Duts & Steve DeArm

Here we are back from the Holidays, presenting our fourth consecutive Poyting Around, let's just hope we can continue. This week's column will be short - but sweet (HA!) stressing a few juicy tidbits from the Thanksgiving Festivities.

This week the Hickey of the Week Award - does not go to a Wesleyan student. Constable Downing is the recipient....his dog Ralph Jr. kissed him on the nick. To whom it may concern; Portville - Steve is coming home for Christmas. We hope the Holidays help Paul Robbinett bear fruit where he needs it most, after his run in with the freshmen boys. Saw Harper's dog with a tie on the other day, but isn't it funny how beings who live together a long time tend to look like each other? Who owns who?

Ever since D. B. went to the movies last week - CLYDE BARROW LIVES!!

Sometime when you're feeling low (and want a lift) visit

The Deviates Den, Louie & Beate are the establishments mentors.

Gee Charlottes got Gill's now! Seriously George - NICE TIRES!

Hear Ye Hear Ye, let it be known in the county of Nash, in the sovereign state of North Carolina this 4th day of December in the year of our Lord (wherever He may be - dead or alive) nineteen hundred and sixty seven, that ROSEY HAS A CAR ON CAMPUS!! That was a wasted sentence wasn't it?

Sad and improbable story of the Month: Over the holidays Tom Beach chanced to see a pond in a federal game reserve - and taking his gun with him - he got goosed by the fuzz. He will need a lawyer.

Seriously Frankenstein, when you see a stop sign - step on the brake, NOT the accelerator....And driving a police car too. Such a NICE guy.

Really Reilly you were really going 15mph. We feel sorry

for Skip.

Norma we think we should say something nice about you so, Something nice about you Norma.

A Belated "Happy Birthday" to "Coach" Harper our beloved gym keeper on his 58th birthday last Nov. 27th. Don't worry, they won't retire you. You're more of a tradition than the fountain.

You might ask Barbara Koehnlein what it was that stuck to her wall sometime back after she came in on a date.

As our poyting note: "Smoking is the easiest thing in the world to give up, I've done it hundreds of times." --Mark Twain

Gun Club News

At last! The Decree has finally heard from the National Rifle Association. Their letter pledged full support for our endeavor, and they have furnished us with the names of two field representatives. Either of these gentlemen is available for counseling and/or a possible visit to the campus. Complete information concerning affiliation with the NRA has also been received.

From the Department of Wildlife and Resources of the State of North Carolina, a complete program for the establishment of a Hunter-Safety Course has been provided. The course is open to prospective instructors as well as to those persons who seek instruction in safety and subsequent registration with the NRA.

The only immediate stumbling block is the lack of an advisor. Once a suitable faculty member has been located, a meeting of all of those who signed the petition and any other prospective participant will be called. Read The Decree for further developments.

**BEAT
THOSE
KNIGHTS!**

READ THIS!

by John Dorsey

Admittedly, not much happens on a campus as small as Wesleyan's, but we are sure that many things of interest are overlooked.

THE DECREE, in the interest of more diversified coverage of Wesleyan's news, would like some new writers. At this point you are wondering what you could do for us. Perhaps you took a trip---to the jungles of the Amazon this summer, we don't know. However, there are interesting people in this college, doing interesting things.

Those persons interested enough to contribute work, or present themselves for an interview can come to THE DECREE office or see me in room 215 Edgcombe.

We're not as dull as we think.

Toronto--Applications submitted by coeds to the unofficial computer dating center at the University of Toronto indicate the virginity rate at the University has increased 20% in the past year. Computer engineer John Pullam said 80% of the feminine applicants claimed virginity this year, compared to 60% last year. "That's quite a gain", Pullam said, "Personally, I don't believe it."
