VOL. XIII      April, 1956      NO. 3

---

Behold, what manner of love the Father hath bestowed upon us, that we should be called the sons of God.—(I John 3,1.)

Each of us came into this world filled with the love, the good, of our Heavenly Father. We depart from them through our own wilfulness, selfishness. But even then God continues to love us as His children, ever ready, through our prayers, to forgive and help us.

## SANDY SAYS:

It amazes visiting Europeans to observe the way Americans tear down old buildings (buildings that would be considered practically new over there), trade in automobiles after only two or three years, and junk so many household appliances or furnishings that still have not been worn out.

Americans who go abroad find it one of the interesting things about Europe that people have been living in the same houses, wearing the same kind of clothing and using many of the same kinds of things that their grandfathers and great-grandfathers did before them.

To Europeans, we probably seem a restless people, without deep roots in any one place. Where Europeans like things to remain the same, we like change. What makes us different?

For one thing, our kind of economic system. Our production and exchange system is geared to the adoption of new ideas, to improvement and rapid expansion. When we think we've found a way of doing things in a better way, we aren't satisfied to go on doing them the old way. Europeans might not be comfortable in this kind of economic climate--but it has given us more things, for more people, than any system ever employed abroad.
