## PLANT NO. 7

One of the supervisors of Plant #7 found out the hard way that he's not as young as he thought he was. One morning recently, he came in to work with his arm in a sling, saying he got tangled in a fence and fractured his wrist--but, it's rather strange that his wife, who is employed in another plant, was out of work all that week too--and especially after the supervisor went by a local store a couple of evenings earlier and told the clerk that he wanted to purchase a "light weight mattock," one his wife could use.

A group of fishermen (??) from Plant #7 went down to the Carolina coast on a week-end fishing trip recently. When they returned, quite a few fish tales were swapped, but there were no fish to show as evidence and we're still wondering. Captain Edwards, can you shed any light on the subject?

Frank Kapp of the Knitting Department is a patient at the local hospital. We wish for him a speedy recovery and hope he can return to work soon.

It's good to see Carlos Auman out again after undergoing surgery recently. Carlos is employed in the Knitting Department, also.
