

Carelessness Takes No Vacation

A bottle was left on the floor at Southern Die Casting and, as the sweeper turned around to put some trash in a barrel, he stepped on the bottle. Fortunately, he was not injured too seriously, but he did require medical attention. Your carelessness may be the cause of someone's getting injured.

It pays to check every tool or machine you operate. A machinist plugged in an electric hand grinder. He did not know the last person who used the grinder had left the switch turned on. Nor did he notice that he was holding the grinder with his hand. When the current started the grinder, his thumb was cut in several places with the grinder wheel.

A knitter was carrying her tweezers in her pocket with the sharp points protruding. As she stooped over to pick up socks, her arm was cut on the tweezer points. Now we know to keep the sharp points of our tools covered in holsters provided for that purpose.

Then there was the dye machine operator who was washing a sock in the machine while the machine was in motion. The machine reversed and caught his hand between the machine and the basket. Six stitches were required. All operators of all kinds of machines are again reminded to keep hands out of machines in motion.

Our excellent record of over 3 million hours worked without a lost time injury at Plant #7 was broken when an employee in the Shipping Department struck her toe against a case of goods, fell and fractured her hip. Every employee has a part in our safety program. Watch every step you take. It could be you next time.

Protect your eyes with safety goggles. You can get the original eye replaced with one of glass which will look the same to other people, but you can't see the same with it.

"Now, remember—sleep all day, and cry all night!"

A daughter, Merri-Beth, was born to Mr. and Mrs. Jack Mabe on June 30, 1963. Jack is employed in the Planning Department.

A son, Tony Dale, was born to Mr. and Mrs. Ben Hooks on June 23, 1963. Ben is superintendent of Plant #1 where Mrs. Hooks (Virginia) was formerly employed.

A son, William Ernest, was born to Mr. and Mrs. Ernest Creasey on June 5, 1963. Ernest is employed in the Knitting Department of Plant #1.

A son was born to Mr. and Mrs. Douglas Rozier on June 13, 1963. Mrs. Rozier (Shirley) is employed in the Knitting Department of Plant #1.

A daughter, Alisa Ann, was born to Mr. and Mrs. "Mac" McHenry on June 19, 1963. Mrs. McHenry (Louise) is employed in the Knitting Department of Plant #1.

A daughter, Janet Leigh, was born to Mr. and Mrs. Johnny Trexler on June 7, 1963. Mrs. Trexler (Anna) is employed in the OEM Division of MAC Panel.

A daughter, Susan Margaret, was born to Mr. and Mrs. Donald V. Creede on July 4, 1963. Don is vice president of sales in the MAC Panel Division.

A son, Keith Allen, was born to Mr. and Mrs. Darrell Owenby on June 27, 1963. Mrs. Owenby (Janice) is a seamer at Plant #1.
