**KEEP YOUR WORK AREA
CLEANED UP AND IN ORDER**

Good housekeeping habits help prevent accidents, make your job safer. Only materials needed for immediate processing should be kept in vicinity of machines and piled in an orderly manner clear of aisle space. "Bulk processing needs" should be stored in a separately designated area removed from the production line. Tools when not in use should be kept in racks provided. Waste material should be cleaned up around machinery and oil, grease or water from off the floor. Form the good housekeeping practice of having a place for everything and everything in its place.

Wonder if these three bathing beauties will be on the beach again this summer??? Guess who they are. . .

If all that we say in a single day,
With never a word left out,
Were printed each night in clear black
and white,
'Twould prove queer reading, no
doubt.
And then, just suppose, ere our eyes
we could close,
We must read the whole record
through;
Then wouldn't we sigh, and wouldn't
we try
A great deal less talking to do?
And I more than half think that many a
kink
Would be smoother in life's
tangled thread,
If half that we say in a single day
Were left forever unsaid.
