## Employees Surprise Hutchison

Terry Hutchison, former Plant Manager in Plants 4 and 14 in Kernersville, was treated to a surprise luncheon January 24 by plant employees. The treat was to celebrate his promotion to Plant Manager of Plant 6 in Hickory,

where he began work February 4.

"I want to thank you all very much for everything you have done for me in the past two and a half years," Hutchison said after recovering from the surprise in

the plant. "We've made a lot of improvements but none of those could have been possible without your help."

"I'm going to miss everyone," he said. "You've been a big help to me."

Hutchison, a native of Greensboro, is a graduate of East Carolina University where he majored in business administration. Formerly, he was employed with Kayser Roth in Burlington.

Plant employees from each of the three shifts were responsible for the luncheon and presented him several gifts including a sport coat, sweater, ties, gloves, shirt and plaque. Many employees expressed regret at seeing him move.

"We're really going to miss him," said Jeanette Surface, a seaming supervisor. "He has been so supportive, I would just tell the folks in Hickory to take good care of him."

Among the improvements Hutchison mentioned is an improved production cost effectiveness and off-grade percentage.

Hutchison's wife, Laura, and their five-month-old daughter, Dawn, were on hand for the surprise luncheon.

### Retirees

- Annie Mae Lewis  
Plant 75
- Maerene Presnell  
Plant 7

## Workers Avert Tragedy On Winter's Coldest Day

Some observant Adams-Millis employees helped to avert what could have been a tragedy in Kernersville January 21.

That was the day temperatures plummeted to record lows throughout the state and the nation.

During that day Becky Lewis, Planning Coordinator in Plant 3, noticed an elderly woman, believ-

ed to be in her 80s, walking along N.C. 150 located beside the plant. After noticing that the woman appeared disoriented, she notified Plant Manager Larry Strader and Doug Shelley, Maintenance Superintendent.

"We watched her briefly," Strader explained. "Then Doug and I drove over to her."

He explained that by the time

they reached her she had walked some distance farther down the street and had walked into a lane of traffic.

"A truck had stopped to let her get back across the street but the driver had not gotten out to help her," Strader said. "It was obvious she was in trouble."

"When the truck moved on we drove up beside her and asked if

we could help her," Strader continued. "She told us she was trying to find the Winston station. We assumed she meant the bus station."

Strader and Shelley said they believed the woman had walked away from one of two nearby nursing homes. Once the woman got into the car they took her to one of the nursing homes.

"They told us that the woman was from the other nursing home but they took her in and cared for her until she could be returned to the other," Strader said. "When we got to her she was in pretty bad shape. She was cold and shivering but everything turned out alright."

Temperatures that day dropped to minus 9 degrees in the Triad.
