

Architect's Drawing of New NCC Student Union Building

## New Student Union Building Approved

North Carolina College will add to its physical plant a \$1,020,000 student union building, William Jones, chairman of the college's interim committee, announced recently.

To be located on Fayetteville Street between George and Nelson streets on property recently acquired by the college, the building will be two-story with split-level entrances. It will contain 38,986 square feet of space and will be constructed of reinforced concrete with brick and concrete exterior. A spacious paved parking lot is planned adjacent to Fayetteville Street to serve the building.

The fully air-conditioned structure, which will also be equipped with the latest modern food service equipment, will have a variety of modern service and recreational facilities.

The ground floor will contain a post office with 1500 boxes,

a book and supply store, beauty and barber shops, a cafeteria and dining room with terrace, a snack bar, and ping pong and billiards rooms.

On the upper floor will be a large lounge and multipurpose room for lectures, concerts, and dances; office space for the college's Student Government Association and for student publications, a general administrative office area, music and recreation rooms, and television and reading rooms.

Architects for the project are Carr, Harrison, Pruden, and DePasquale, Associated Architects of Durham, with George Watts Carr as the consulting architect.

According to Jones, bids will be advertised in July. A \$660,000 loan by the U. S. Department of Housing and Urban Development will support part of the cost of the project.

## Begun In 1963, NCC Building Projects Pass \$2 Million Mark

North Carolina College has completed nearly three-fourths of a number of construction and improvement projects launched in June, 1963, at a cost of \$4,068,500 and has received approval for the construction of a chemistry building and an additional 400-person high-rise dormitory.

Completed or nearly completed in the massive undertaking begun in 1963 are three buildings totaling \$2,655,000. They are a 300-bed addition to Chidley Hall for men, \$825,000; a high-rise nine-story residence for 400 women, \$1,200,000; and a cafeteria, \$630,000. The men's residence was occupied in September, the women's residence is completed but not yet occupied, and the cafeteria is nearing completion.

Other projects completed under the program are the equipping of a closed-circuit television system, \$75,000; equipping a language laboratory, \$49,000; air-conditioning the college's library, \$100,000; construction of a storage facility, \$25,000; providing culvert and fill from Dupree to Lawson streets, \$35,000; enlarging coal bins, \$14,000; improving sidewalks, \$9,000; improving the new women's dormitory, \$15,000; and repairing Old Senior Dormitory, \$8,500.

Three major projects approved in 1963—construction of a student union building, an addition to the science building, and renovation of the administration building—remain to be completed. The institution, however, has replanned two of the projects and has received approval for new construction in these respects: the student union building, originally to cost \$720,000, will now cost \$1,020,000. Instead of adding to the science building at a cost of \$288,000, the college will construct a chemistry building costing \$765,000. Funds earmarked for renovation of the administration building remain at \$160,000, as approved in 1963.

Approval of construction of

the new buildings—the chemistry building and an additional women's residence—was announced recently by William Jones, chairman of the college's Interim Committee. The dormitory, a high-rise building identical to the new one now completed, will cost \$1,200,000.

Two of the buildings, the student union and the dormitory, will be on a tract of land approximately one square block in area recently acquired by the college, with George, Fayetteville, and Nelson streets as

### Biology Professor To Attend Russian Microbiology Meet

Dr. Nell Hirschberg, professor of biology at North Carolina College, will attend the 9th International Congress for Microbiologists July 24-31 in Moscow, Russia, where she will present a paper on Leptospirosis from data gathered under a U. S. Public Health Service grant.

A member of the American Society of Microbiologists, she will be one of several American microbiologists attending the congress.

Dr. Hirschberg will travel through the Balkans on her return to the United States.

boundaries. The student union will face George and Nelson streets, with a spacious parking area on Fayetteville Street, while the high-rise dormitory will be erected on the George-Nelson Street block facing George Street.

### Twenty Visitors On Summer Faculty

Among North Carolina College's summer faculty of 82 persons are 20 specialists from a variety of colleges and universities and school systems, a report by Dr. C. L. Patterson, acting director of the Summer School, revealed recently.

Visiting personnel, who augment the institution's regular teachers in five departments, are the following:

In education: Mrs. Ruth Anderson, Roanoke City Schools, Roanoke, Virginia; Dr. John Burks, Jersey City Teachers College, Jersey City, N. J.; Dr. James T. Guines, St. Augustine's College, Raleigh; Mrs. Piccola L. Morrow, Winston-Salem Public Schools; Dr. M. Vanella, University of North Carolina at Greensboro; John M. Hennike, University of North Carolina, Chapel Hill.

Mrs. Marian Vick, Winston-Salem State College, Winston-Salem; Dr. Richard Fields, Bennett College, Greensboro; Dr. David Reilly, Woodbridge, New Jersey; Dr. Edward Nicholson, University of North Carolina, Chapel Hill.

In library science are Mrs. Hazel Bass, Durham; Mrs. Ocydee Williams, Waycross, Ga.; and Mrs. Nell B. Wright, Winston-Salem State College, Winston-Salem.

Others are Dr. Raafat Mishriky, University of North Carolina at Chapel Hill, mathematics; Dr. Jack S. Brayboy, Johnson C. Smith University, Charlotte, physical education; Charles Jarmon, Duke University, sociology; and Karl Garrison, Duke University, sociology.

## College Announces New Graduate Media Program

North Carolina College recently gained approval by the State Department of Public Instruction and the National Council for the Accreditation of Teacher Education to offer a graduate program for the preparation of audiovisual directors.

The most recently approved among several NCC education programs authorized this year, the new program was announced by James E. Parker, director of the college's Audiovisual Center, and Dr. F. G. Shipman, chairman of the Department of Education. Leading to a Master of Arts degree, it is designed to offer training which will qualify students as directors of public school audiovisual programs.

Satisfactory completion of the course of study can lead to appointment as an audiovisual director in individual school units or in city or countywide school systems, Parker said, adding that more and more school units and systems are appointing audiovisual directors under the impetus of the availability of NDEA funds.

The NCC course of study includes twelve semester hours of audiovisual education, including a thesis; six semester hours of basic foundation courses in education; six semester hours of educational administration and supervision; and from nine to twelve hours in a subject-matter minor.

Experiences provided in the program include selection, utilization, administration, and production of a variety of types of instructional materials. Candidates will have experiences in instructional television, photography, graphic materials, recordings, and in-service training workshops.

Commenting on values of the program, Parker said: "Approval by NCATE means that North Carolina College graduates will be accepted and certified in other states. The preparation program at NCC is therefore national in scope. Many job opportunities in the field are available, and they are growing in number as other facets of education develop—such as Breakthrough, the National Teachers' Corps, and Headstart."

TIME OUT FOR RELAXATION—Seeking refuge from the summer heat, Brenda A. Tiggart picks a shady spot on the North Carolina College campus between classes for a moment of relaxation. A junior majoring in psychology, she is a native of Salisbury.
