

Rehabilitation

(Continued from page 5)

Patients who must learn ways of performing daily tasks with a minimum amount of effort.

The Occupational Therapy Department, which was housed in temporary quarters on the third floor of the hospital during the renovation period, last year handled a total of 5,365 patient visits.

The Division of Physical Medicine and Rehabilitation, coordinated by Dr. Robert A. Gregg, occupies a suite of offices and examination rooms near physical and occupational therapy. Dr. Gregg and Drs. Frank Clippinger (orthopedic surgery), Morton Bogdonoff (medicine), Claude Nichols (psychiatry) and Edwin P. Alyea (urology) form a senior staff rehabilitation team that provides consultative service in long-range planning for patients with chronic illness. This group works primarily with hospitalized patients. David Henry is executive secretary of the Division's Continued Care Program which provides rehabilitation for patients after they leave the hospital, and Dr. Gelolo McHugh, a psychologist, is research director of this program.

Facilities for the Division of Physical Medicine and Rehabilitation include offices, a conference room where the senior staff meets twice each month, a general examination room, and a room for electromyography.

The Prosthetic and Orthopedic Appliance Center, directed by Mr. Bert R. Titus and known to hospital personnel as the Brace Shop, has gained additional space by excavation beneath the Medical School and by new construction in part of a parking court near the hospital post office. A steep, narrow stairway leading from the first floor of the Medical School to the Center has been eliminated. Patients can now enter a large, comfortably furnished waiting room from the basement corridor of the Medical School or from the parking court.

Two new fitting rooms for artificial limbs and orthopedic appliances adjoin a walking area equipped with hand rails and full length mirrors. Here, patients can try out new appli-

ances during fitting and practice using them before leaving the Center. A third fitting room is designed primarily for fitting corrective shoes and corsets.

Beyond these fitting rooms are a leather room for such work as making leather parts for braces and working on special shoes; the brace shop proper where orthopedic appliances are made; a tile-walled plaster room; a plastic room for work involving the use of plastics in prosthetic appliances; and the limb shop for wood-working and other crafts that are utilized in the fabrication of artificial limbs.

A project carried out concurrently with the rehabilitation undertaking is the renovation of the Hospital Store or "Dope Shop" and its enlargement by construction above the new portion of the Prosthetic and Orthopedic Appliance Center. Now more than twice its former size, the Dope Shop has lost its tables and benches where students, not to mention personnel, gathered for coffee breaks, but has gained in efficiency and attractiveness of surroundings.

Dr. Hudson

(Continued from page 6)

Otolaryngology since the opening of the Center in 1930.

Dr. Hudson came to Duke in 1961, following a year as a fellow at the Johns Hopkins Hospital. Originally from Charlotte, he holds the M.D. degree from the Bowman Gray School of Medicine.

From the Auxiliary

(Continued from page 3)

both the Student Fund and the Hospital Chapel Fund, another of her major interests.

A memorial service was held for Gin on Saturday afternoon, May 25, at four o'clock in Duke Chapel. Her valiant and indomitable spirit, her uncompromising integrity, and her utter loyalty, once committed, to any person or project are qualities of spirit which defy extinction. She can never cease to be a challenge and inspiration to everyone who has known her.

This 'n' That

New Arrivals

Surgery

Dr. and Mrs. Banks Anderson, Jr., a son, William, on April 22; a daughter, Kimberly, to Dr. and Mrs. Milton Campbell on April 19; and Mrs. Darrell Jervey, a daughter, Elizabeth Wood, born April 27.

Wedding Bells

Surgery

Janet Webster, Dr. Anlyan's technician, will be married to Edward B. Anderson on June 22 in Connecticut.

Surgical PDC

Louise Cheatham Ruggles and State Representative Nick Galifianakis were married at noon, April 5.

On June 29 Sylvia Jane Henson and Eus. John Calvin Dailey, Jr., will be married. (John Dailey's mother is SPDC Registrar.)

New Faces and Old

Surgery

Surgery welcomes Judy Fuller to Dr. Hudson's office; Gloria Lamb to the Dean's Office and Ann Richards as secretary to Dr. Stickel.

Rosalie Russell is transferring from the Dean's Office to the Department of Physiology.

Dr. Anlyan and Dr. Grimson are now settled in their new quarters in the Clinical Research Building.

Surgical PDC

Mrs. Edith P. Holland comes to SPDC from the Nursing Department as an insurance reporter.

Physical Therapy

At the North Carolina Physical Therapy Association meeting held at Duke on March 30, Ellie Flanagan was elected to a two-year term as president of the chapter. Ellie also served as program chairman for the day.

On May 10 Nancy Davison resigned to join her husband who is stationed with the Army in Texas; Lee Grabski will begin his six month stint of active duty in the U. S. Army Reserve on July 1; and Durell Whiting leaves
