

PROFESSIONAL NEWS

DR. DAVID T. SMITH, James B. Duke Professor of Microbiology, has been included in a documentary film entitled "The Old Killer Strikes Back." Written and produced by the public affairs director of an Oklahoma City television station, the film is a combination of drama and factual material designed to bring an apathetic public back into action. The film presents the history of tuberculosis from "the days when a doctor's advice was 'hope and pray' through the isolation of tubercule bacillus, the discovery of the BCG vaccine, the ups and downs in medical discovery, control and prevention of the disease."

A gift of \$200,000 has been made to the medical center by the late Mrs. John P. Gibbons of Hamlet. The money is to be used for the study of mental health and to support the J. P. Gibbons Professorship in Psychiatry, which was established in honor of Mrs. Gibbon's husband. The professorship is held by DR. EWALD W. BUSSE, Chairman of the Department of Psychiatry.

Ten faculty members were in attendance at the April San Francisco meeting of the American Association of Anatomists. Seven presented papers. Those in attendance were Drs. Markee, Everett, Duke, Moses, Becker, McFalls, and Tejasen, and William Redmond, J. Edward King, and Albert Klein.

DR. FREDERICK BERNHEIM, James B. Duke Professor of Pharmacology, recently delivered the fifth Paul K. Smith Memorial Lecture in Pharmacology at George Washington University School of Medicine in Washington. His lecture was entitled "Effect of Some Drugs on Bacterial Permeabilities."

DR. M. J. MOSES, Associate Professor of Anatomy, has been appointed to the Cell Biology Study Section of the National Institutes of Health.

RAY E. BROWN, Director of the Graduate Program in Hospital Administration, spoke on "Background to Medicare" at the Symposium on Implementation of Medicare, held in Charlotte.

DR. R. F. BECKER, Associate Professor of Anatomy, has been awarded a grant from the Committee on Tobacco Research of the AMA to continue his studies on the effects of nicotine absorption during pregnancy. His earlier work in this field was supported by the Council for Tobacco Research, U.S.A.

DR. SANFORD I. COHEN, Professor of Psychiatry, was recently awarded a fellowship by the Commonwealth Fund for a short period of study in Czechoslovakia and the Soviet Union.

DR. JOHN BUETTNER-JANUSCH, Associate Professor of Anatomy, chaired a session of the April meeting of the American Association of Physical Anthropologists in Berkeley, California, and presented a paper on "Primate Hemoglobin and Evolution." Later in the month he visited the University of Chicago and inaugurated a lecture series on "The Gene in Evolution."

The Duke Department of Physical Therapy was host to the spring meeting of the N.C. Chapter of the American Physical Therapy Association. The program of the meeting was devoted to the "Impact of Medicare on Patient Care as Related to Physical Therapy."

At the State Capitol Building in Raleigh recently the oath of office was administered to DR. EWALD W. BUSSE, Chairman of the Department of Psychiatry, as a member of the N.C. Governor's Coordinating Council on Aging. Dr. Busse will serve on the council through June, 1969.

DR. PHILIP HANDLER, James B. Duke Professor of Biochemistry, was honored at a luncheon given by the Harvey Cushing Society, Inc., in St. Louis, Mo. Dr. Handler was the Cushing Orator at the event.

A hardbound book, *Survey of American Pathologists*, will be released by Williams and Wilkins Co. this spring which is an analysis of the sources and training of research pathologists. Prepared by the Committee on Analysis of Training for Research in Pathology, the book is based on a survey which examines closely why students choose pathology careers. DR. THOMAS D. KINNEY, Chairman of the Department of Pathology, chaired the committee which conducted the survey, and he is largely responsible for the publishing of the book.

The 63rd annual meeting of the American Association of Pathologists and Bacteriologists, held in Cleveland, was chaired by Dr. Thomas D. Kinney and was also attended by Duke Drs. Trump, Vogel, Hackel, Kaufman (who chaired one of the scientific sessions), McCarter, Vazquez, and Wittels. Six of those in attendance presented papers.

A new and informal pathology organization, the American Association of Medical School Chairmen of Pathology, held its first annual meeting in Cleveland during the week of the AAPB meeting. Dr. Kinney was also in attendance at this meeting, as the association's first chairman.

Following the AAPB meeting, the 55th annual meeting of the International Academy of Pathology was held in Cleveland. Drs. Trump and Kaufman stayed to participate in this second meeting, Dr. Trump as a scientific exhibitor.

BOOK REVIEW

"When the hamstrung administrator starts looking for his tormentor, he will be smart to look in the nearest mirror, since frustration is a state of mind and therefore strictly a product of the individual's own thinking," wrote Professor Ray E. Brown in his new book entitled *Judgment in Administration*.

"It is intended," wrote the author in the "Preface," "that the book be a very practical treatment of a very practical subject."

The hardbound volume, published as a part of the McGraw Hill series in Management, contains intriguing chapters heads that invite the reader to peruse its pages. Several of the headings read as follow: "Stress Can Distress Good Judgment," "The Perfectionist in Administration Often Reaps Imperfection," "The Fear of Losing Can Take the Joy Out of Winning," "Feelings Are a Common Cause of Failings," "Success Does Not Always Come from Succeeding," and "The Administrator's Best Skills Sometimes Become His Greatest Handicaps."

The author is professor of hospital administration and director of the Duke University Graduate Program in Hospital Administration.
