Clerical Upgrade

(continued from page one)

"We want all Duke employes to have the chance to develop and improve their skills in line with their own capabilities and the training opportunities that may be presented," Ed Bennett, assistant director of University personnel, said. "Hopefully, through 'in-house' training, we may be able to fill the majority of our higher-rated jobs at Duke from within. This way, we may take on new employes at ground levels and help them find their niche through skills-development training during their employment."

Training Director James DeLeo added, "We believe that the Affirmative Action training projects are a start toward making Duke University a leader among area employers in providing meaningful job opportunities for its employes."

Taking part in the first clerical upgrade program were Mrs. Gloria Bass, a food service supervisor for three years, Mrs. Helen Ruffin, with medical food service operations for two and a half years, Mrs. Carolyn Rogers, a ward clerk on Nott at Duke for two and a half years, and Miss Marian Armstrong, who worked with messenger service.

The two University employes in the program were Mrs. Peggy Brandon and Mrs. Myrtle Washington.
