

Goldie Hardison Killed In Automobile Mishap

Goldie Hardison, who worked for over six years in the payroll and insurance office at the medical center, and her mother, Mrs. Kathleen Mae Midyette, were killed in an automobile accident Oct. 16 as they were returning home from a weekend at the coast.

Mrs. Hardison's husband, John, an employe in the Physical Education Department, was seriously injured in the mishap.

The Highway Patrol said the wreck occurred on U.S. 264, two miles west of Middlesex, when a car passing another vehicle collided head-on with the Hardison car.

Memorial services were held last week.

WHY IS THIS MAN SMILING?—If you don't know and would like to find out, you'll have to ask someone in the Emergency Room because "Intercom" isn't saying. The man with the smile is James Kennington who recently resigned from his job as supervisor of the Emergency Department business office to assume a similar position at a Los Angeles hospital. Pictured with him, left to right, are ER business staff members Kathy Dickey, Linda Temple and Julia Lawrence whom, along with other ER personnel, he characterized as "the finest bunch of people I've met in my whole life." At a farewell party friends gave Kennington an electric tie rack and an "executive foot rest." (photo by Judy Carrier)

Dr. Pauline Gratz, professor of human ecology in nursing, has been selected to receive a National Science Foundation American Association for the Advancement of Science Grant in human genetics and societal problems. She is one of 25 participants in a research study directed toward drafting a tool which can be used to determine attitudes of students involving "Human Genetics and Societal Problems."

Dr. Gratz, along with her fellow participants, has been selected on the basis of specific criteria which include the understanding that she will attend a two-day preparation session, return to her home institution to carry out the research, and then attend a two-day post-session upon completion of the interim project.

Dr. Gratz, of Bronx, N.Y., received her B.A. degree in biology and physiology from Hunter College of the City University of New York. She obtained both her M.A. and Ed.D. degrees from Teachers College, Columbia University.

She joined the Duke faculty in 1969 as professor of human ecology in nursing.

Dr. Gratz has also received two other awards—the National Science Foundation Fellowship in genetics from Wesleyan University in Connecticut and the Shell Merit Fellowship in science education from Stanford University in California.

New Position

(continued from page 2)

serves as an instructor of pharmacy there.

He has held the position of assistant director of the Plan of Pharmacy Assistance, a program devoted to the improvement of pharmaceutical services
