E. L. Jones Cancer Research Building

Earth To Move For Cancer Center

Earth will be turned tomorrow at a formal groundbreaking ceremony for the Edwin L. Jones Cancer Research Building.

The Jones Building will be the first structure of Duke's Comprehensive Cancer Center. The federal government has selected Duke as the location for one of the major cancer research, diagnostic and treatment facilities in the United States.

The groundbreaking ceremony will begin Saturday at 2 p.m. at the construction site on Research Drive adjacent to the Alex H. Sands Building, a medical sciences building now under construction.

Among those scheduled to attend is Dr. Frank Rauscher Jr., director of the National Cancer Institute.

Others who will speak at the ceremony are Dr. William G. Anlyan, vice president for health affairs; Edwin L. Jones Jr.;

President Terry Sanford; and Dr. W. W. Shingleton, director of the Comprehensive Cancer Center.

Also present will be members of the University Board of Trustees, the full body of which is meeting here this Founder's Day weekend.

A \$1 million gift in the name of the late Edwin L. Jones of Charlotte was made to Duke toward establishment of the Comprehensive Cancer Center.

The private gift was made up of contributions from 16 members of Mr. Jones' immediate family and from the J.A. Jones Construction Co., which Mr. Jones headed as chairman of the board until his death last year.

The 60,000-square-foot Edwin L. Jones Cancer Research Building will be occupied by scientists engaged in cancer research in virology, immunology and cell bilology, as well as by clinical scientists carrying out research on problems related

to patients.

An extensive clinical cancer program, however, figures in the second phase of the Comprehensive Cancer Center's development.

As part of this first construction phase along with the Jones Building will be a separate isolated laboratory called Animal

Plans Announced For New Library

The university will construct a \$5.3 million medical communications center and library as part of its long-range plan for an expanding medical and health sciences complex.

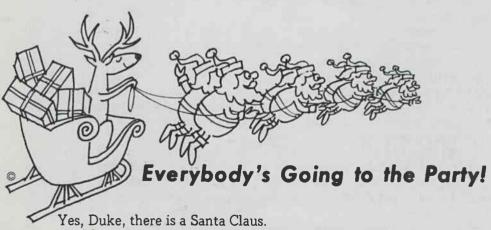

In making the announcement, President Terry Sanford and Vice President for Health Affairs William G. Anlyan said the new five-story facility will be named the Seeley G. Mudd Building. (see artist's sketch on Page 3).

A gift of \$1.5 million toward the building's costs is being provided by The Seeley G. Mudd Fund of Los Angeles.

Dr. Mudd, who died in 1968, created the fund in his will. The fund is to be totally expended during the decade of the 70's for buildings at privately endowed colleges and universities throughout the country. It is estimated that over \$42 million will be disbursed to 28 colleges and universities.

Dr. Mudd was graduated from the Harvard University Medical School, with honors, in 1924. For 17 years he was engaged in research in radiation and x-ray therapy at Caltech. He served as dean of the University of Southern California School of Medicine.

Dr. Mudd had been a trustee of the (Continued on page 3)

And he'll be at the annual Medical Center Christmas Party next Thursday afternoon and Thursday night in the new addition to the Hospital Cafeteria.

The hours will be from 2-4 p.m. for those who work a daytime shift and from 10:30 p.m.-midnight for people on night duty.

Circle Thursday, Dec. 14, on your calendar right now and don't miss out on your share of food, punch and entertainment.
