Dr. Wilson Named to H.E.W. Panel

The Dean of the School of Nursing, Dr. Ruby L. Wilson, has been appointed to the National Advisory Council on Nurse Training of the Department of Health, Education and Welfare.

The four-year appointment was announced by HEW Secretary Caspar W. Weinberger.

The 19-member council of experts in nursing, other health professions, education and community affairs advises HEW's Division of Nursing on policy and the administration of grants to nursing schools. It also gives final review to applications for federal funds to improve nursing education and expand the scope and scientific basis of nursing practice.

Dr. Wilson became dean in 1971 after returning from a two-year assignment in Thailand for the Rockefeller Foundation.

She served as visiting professor and consultant for the foundation in developing the service and educational programs for patient care with particular emphasis on the department and School of Nursing at Ramathibodi Hospital, Mahidol University, in Bangkok.

Her affiliation with Duke began in 1955 when she was named an instructor in medical and surgical nursing. In 1959 she was promoted to assistant professor, and from 1963 to 1966 she was also an associate in medicine, assistant to the director of nursing services and clinical specialist in nephrology.

From 1966 to 1968 she took a sabbatical and educational leave and earned her doctorate in higher education at Duke.

Rodio Joins Eye Center

Klima To Assume Md. Post

Dennis E. Klima, administrator of the Eye Center and assistant director of the hospital since September of 1971, has resigned to accept the post of assistant administrator of Memorial Hospital in Easton, Md., effective December 31.

Memorial is a 200-bed community hospital on the eastern shore of Maryland's Chesapeake Bay.

"My wife Sandra and I both have cherished our experience at Duke," Klima said while explaining his new position, "but we felt that this appointment is a professional advancement I shouldn't pass up. Part of my new job will be to prepare Memorial Hospital for compliance with Maryland's state rate review commission, a relatively new concept of hospital cost control which will probably affect every state in the union within the next five to 10 years."

A 1968 graduate of Duke's Graduate Program in Hospital Administration, Klima worked with other medical center planners toward the establishment of the Eye Center — its construction, the ongoing services it will provide and the physical transfer of the Department of Ophthalmology into the new facility in recent months.

Sandra Klima, who graduated from Memorial Hospital's nursing program, came to Duke in 1965 as an RN. She has served as head nurse on Holmes Ward and, most recently, professional administrative assistant to Wilma Minniear, director of Nursing Services, before taking a maternity leave last year.

C.J. "Cy" Rodio, former unit administrator on the medical unit and manager of the Medical Outpatient Clinic, has been named to succeed Klima as assistant administrative director of the hospital and administrator of the Eye Center. James A. Goode, who holds a masters degree in health administration from Baylor University and has spent the
