## Former Director Kinney Retires

# Busse Named Medical Education Director

DR. EWALD W. BUSSE

DR. THOMAS D. KINNEY

Dr. Ewald W. Busse, chairman of the Department of Psychiatry, will become Duke's Director of Medical and Allied Health Education on Sept. 1.

He will succeed Dr. Thomas D. Kinney, who has been director since 1969 and who is retiring from administrative responsibilities to return to teaching and research.

The move creates vacancies in two department chairmanships in the School of Medicine. One is Busse's chairmanship of psychiatry, a successor for which will be announced next week.

The other vacancy is the chairmanship of the Department of Pathology, which Kinney has held since coming to Duke in 1960. Kinney will continue to administer that department until a successor arrives within the next few months.

Unlike most medical schools, Duke does not have a dean of the School of Medicine. Instead the Director of Medical and Allied Health Education is the chief educational officer of the medical center. He functions as a medical dean and also is responsible for graduate and continuing medical education as well as education in the multiple fields of allied health training under way at Duke. The School of Nursing is administered separately by a dean.

In structuring medical and allied health education in that manner, the Duke administration felt it

provided a more complete overall coordination of educational functions at the medical center.

In addition to the director, there are associate directors reporting to him who are responsible for undergraduate medical education, admissions, allied health, continuing education and graduate medical education.

"The university and its medical center are deeply grateful for Dr. Kinney's strong and effective leadership in medical and allied health education during the past five years," said Dr. William G. Anlyan, vice president for health affairs.

Under his stewardship, the evolutionary major changes in the medical curriculum at Duke have been firmly established and improved substantially. Dr. Kinney has also established a formal Division of Allied Health with high quality programs. We are certain that Dr. Busse will continue the tradition of excellence in medical and allied health education as well as to provide his own intellectual leadership to the future directions of development," Anlyan said.

Kinney, who is recognized as one of the country's leading medical educators, is the only

person to have held the medical-allied health directorship at Duke.

He is chairman of the Liaison Committee on Medical Education of the Association of American Medical Colleges (AAMC) and the American Medical Association (AMA), and he also was president of the AAMC's Council of Academic Societies.

In 1972-73 Kinney was president of the Federation of American Societies for Experimental Biology, and he has served as chairman or president of a number of other professional organizations including the Association of Pathology Chairmen.

Kinney currently is editor of the American Journal of Pathology.

A native of Pennsylvania and a graduate of the University of Pennsylvania with an A.B. in 1931. Kinney received his M.D. at Duke in 1936. Following internship and residency, he held teaching appointments at the Tufts College of Medicine and at Yale, Boston and Harvard universities from 1938-47.

In 1947 he began a 13-year association with what is now Case Western Reserve University in

## 8 Faculty Members Named

Eight new assistant professors have been named to the faculty of the School of Medicine according to University Provost Frederic N. Cleaveland.

Six of the appointments came in the Department of Radiology and one each came in the departments of Medicine and Health Administration.

Named in radiology were Drs. Roger W. Byhardt, Peter J. Dempsey, Americo A. Gonzalvo, Robert A. Older, Michael Oliphant and Moody D. Wharam Jr. Appointed in Health Administration and Medicine were Thomas J. Delaney and Dr. John J. Gallagher, respectively.

Byhardt received his undergraduate education at Marquette University between 1960 and 1964 and was awarded his M.D. from the Medical College of Wisconsin in 1968. Before joining the Duke faculty, he did a radiation therapy residency at Penrose Cancer

Hospital in Colorado Springs, Colo., and served as acting head of the Radiation Therapy Department of the Center Research Center at

## Hetherington Service Scheduled For Today

A memorial service for Dr. Duncan C. Hetherington, professor emeritus of anatomy at Duke, will be conducted today at 4 p.m. in the Chapel.

The Rev. James Cleland, dean emeritus of the chapel, will conduct the service. Dr. Kenneth L. Duke, representing the Department of Anatomy, will be lecturer.

Dr. Hetherington, who was a member of the original faculty at the School of Medicine, died Aug. 7. He had retired in 1965. His ashes will be interred in Colorado Spring, Colo., the home of his sister, Mrs. W.J. Honeyman.

ADVENTURE IN GROWING AND SHARING - "The thing I like best about camp is that if I don't want to play ball or do arts and crafts, I can just sit under a tree." For tree-climber Josh Horwitz and many other youngsters ages five through 12 their experience this summer at the Duke Day Camp afforded them an opportunity to grow and share with others in an atmosphere of freedom and creativity. See story on page 3. (Photo by Dale Moses)
