**FOR SALE**—Ladies 26" five-speed bike, one year old, excellent shape; cost \$95, will sell for \$50. Call 383-1347, after 5 p.m.

## Urbaniak, Seigler Promoted to Professor

Two surgeons here have received promotions from associate professor to professor, University Provost Frederic N. Cleaveland has announced.

Dr. James R. Urbaniak has been promoted to professor of orthopaedics in the Department of Surgery and Dr. Hilliard Foster Seigler will become professor of surgery, effective July 1. Seigler also holds the rank of associate professor of immunology.

### Urbaniak

A native of West Virginia, Urbaniak graduated from the University of Kentucky, where he received several scholastic awards and was a prominent football player.

He received his **DR. URBANIAK** M.D. degree from Duke in 1962, and was a resident here until entering the U.S. Navy in 1963.

Urbaniak was attending physician to the U.S. Senate and House of Representatives during most of his two years of active duty in the Navy.

He returned to Duke to complete his residency in orthopaedic surgery between 1965-69. During this time he served six months each as chief resident in orthopaedics at Watts and the V.A. hospitals in Durham

## Student To Study in Australia

A third-year student in the School of Medicine has received two \$1,000 scholarships for study in Australia during the summer.

Michael R. Gorman was selected to receive one award from the International College of Surgeons and another sponsored by the Davison Club at Duke.

He will spend a term in an individualized program of study under the direction of Dr. John Ham in the Medical-Surgical Gastroenterology Unit at the University of New South Wales and the Prince of Wales Hospital in Randwick, near Sydney, Australia. Part of his time will be spent working in Ham's clinical gastroenterology laboratory.

### Combined Program

"The value of this program cannot be overestimated to a surgeon-to-be," Gorman said. The combined program will allow him to "incorporate original findings in the laboratory with the constant, clinical medical care of my patients and the surgical procedures with which many devastating diseases are cured or arrested."

In addition, the trip will provide the opportunity for Gorman to compare the health care system of the United States with that of another country with a similar cultural heritage of British colonization, he said.

"The International College of Surgeons hopes that the scholarship will assist Mike in broadening the scope of his studies and that he will be a goodwill ambassador for our country as well as for the college," said Dr. H.E. Strawcutter of Lumberton, who presented the check.

### Davison Club

Gorman was selected for the Davison Club scholarship by a medical school committee headed by Dr. Shirley K. Osterhout, assistant dean for student affairs. Named for the late Dr. Wilburt C. Davison, dean of the medical school from 1927-60, the club was established by a number of his former students, colleagues, friends and patients who contribute at least \$1,000 a year to the School of Medicine.

Gorman, who received a B.A. degree in zoology from Duke, is the son of Mr. and Mrs. Edward Gorman of Bay Village, Ohio.

## Scientist To Head Northwestern Dept.

Dr. Toshio Narahashi, professor of pharmacology at the medical center, has resigned from the Duke faculty to accept a position as professor and chairman of the Department of Pharmacology at Northwestern University in Chicago.

Narahashi joined the Duke faculty in 1965 as an assistant professor. He has served as chief of the Laboratory of Cellular Neuropharmacology and Toxicology, head of the Division of Pharmacology and vice chairman of the Department of Physiology and Pharmacology.

The scientist is best known for his studies on the mechanisms of action of insecticides, anesthetics, natural toxins and drugs on the nervous system.

and later was chief orthopaedics resident at Duke.

Urbaniak was appointed assistant professor in Duke's Division of Orthopaedic Surgery at the completion of his residency in 1969 and advanced to associate professor in 1973.

He is chief of orthopaedic surgery at the V.A. Hospital, and at Duke holds the positions of chief, Upper Extremity Amputee Clinic; co-chief, scoliosis clinic; director, Orthopaedic Research; and director, Orthopaedic Replantation Team.

### Seigler

Seigler was born and educated in North Carolina, and has been at Duke since 1965.

He received a B.A. degree in 1956 and an M.D. in 1960, both from the University of North Carolina at Chapel Hill.

His surgery internship and residency were completed there, and he was chief resident in surgery at UNC in 1964-65.

Seigler was appointed assistant professor of surgery at Duke in 1967, following two years as research fellow in immunogenetics under a special National Institute of Health fellowship. He was promoted to associate professor in 1971.

**DR. SEIGLER**

Since 1970, Seigler has served as co-director of Transplantation Programs for Duke and the VA Hospital, and as co-program director of Duke's Clinical Cancer Research Unit.

Holding the rank of lieutenant colonel, Seigler is chief of professional services with the 3274th Army Reserve Hospital Unit.

The Durham based unit is part of the 120th Army Reserve Command and support the staff of Womack Special Treatment Center, Ft. Bragg, during summer encampment and weekend drills each month.

## List Rental Property

Duke University needs listings of houses, duplexes and apartments for referral to married and single students, faculty and staff who require housing during the summer and the academic year. Property owners and real estate concerns are invited to list rental property without charge at:

Central Campus Office  
Department of Housing Management  
Duke University  
217 Anderson Street  
684-5832

A statement of non-discrimination in acceptance of applications and selection of tenants is required.
