EMPLOYMENT PROGRAM

CONT....

STUDENTS TAKING IT ALL IN AT THE WELCOME DANCE;-----MUSIC AND SMOKE AND PUNCH AND PEANUTS AND FRIENDS AND GOOD VIBRATIONS-----A HEAVY NIGHT!

held on the campus. They attend these classes three weeks and during these few weeks they learn how to get along with others; how to go about securing a job, how to keep the job and how to pass a test.

During these three weeks they talk to their counselor and, if they are undecided about what they want to do, he helps them make up their minds along with listening to some of their many problems.

After three weeks, they are either placed on a job or into technical skill training or admitted to college for further educational training, or any other route they might want to take at this time. The Orientation Counselor is Martha Young and the Employment Counselor is Cary Strickland.

Both are very nice and dependable people who are always on the job and always willing to help in any way. Also part of the Concentrative Employment Program's technical skill training includes learning to operate commercial sewing machines. These classes are taught by Mrs. Elatha Wilson.
