

REID THIS!

In recording the annals of matters Elon, one is bound to begin with A. L. Hook, Bill Terrell, J. Earl and Senior Oak. If one is really astute, he thoughtfully adds Mrs. Emma Lewis to the select list.

On the college roster, Mrs. Lewis is identified as a departmental secretary. To dismiss her worth at just that alone is foolishness piled upon naivete. She is a sort of Elonic legend in her own time through her own unintended doings. She is one of those grand folks who has always helped students any way she could. This is, mind you, a real career. It heightens her stature around campus, then, she would be sublimely unaware of it. Mrs. Lewis would rather look at her tasks as things needing doing that she can handle and let's get on with 'em.

For one thing, she guards itself as if they were The Grail, itself.

Some time past, I suspect enterprising people have tried to have at them. Mrs. Emma fixed that, so tightly that 007, Honey West, Mata Hari and perhaps even H. Reid couldn't break into the test repository.

For a culturally deprived woman (she attended Woman's College in Greensboro in lieu of having studied at that scholarly center of the universe, to wit, Elon) she has managed some marvellous testimonials.

"She helped me," says Prof. Dewey Andrew. "She helped any student any way she could. She is interested in all parts of the col-

ASSOCIATE ANNUAL EDITORS

The three associate editors of the forthcoming 1966 edition of the Phi Psi Cli, the Elon College yearbook, are pictured above. From left to right they are Robert Bagnell, of Chuckatuck, Va.; Susie Kimball, of Burlington; and Fred Bright, of Burlington. The three worked closely with Editor-in-Chief Alex Oliver, of Suffolk, Va., in completing the material and getting it to the printers some days ago.

lege and in all of the students' activities."

Mrs. Lewis' advice, you understand, is as clear and refreshing as the water at the old fountain of the colonnades.

There's an accolade for you. Mine beats mine.

The ultimate that has been said of me is, and I quote "Thank heaven he's gone away from Elon."

Many Elon College Students May Obtain Loan Aid Under New Plan

Many Elon College students who feel the need of a loan to enable them to complete their college education will find the answer in the new College Foundation, Inc., which is a private, non-profit, educational corporation chartered in 1955 and now operating under the revised charter of 1962.

The purpose of the foundation is to assist North Carolina boys and girls in obtaining an education beyond high school, for the Foundation administers the North Carolina Bankers' Student Loan Plan. The Bankers' Plan is the result of the combined efforts of the state government officials, college personnel, participating banks and other Tar Heel business men.

The first Bankers' student loans were made during the 1963-64 academic year, and since that time over 1,200 student loans have been approved that totalled over \$500,000. The students who received these loans are attending fifty of North Carolina's colleges and universities.

The Foundation has agreements with ninety-two North Carolina banks whereby it may borrow up to one per cent of the capital and surplus of the banks. The assets of the Foundation are \$250,000 as of July 31, 1965 audit report. The Foundation's assets come from private contributions of individ-

uals, businesses and industries. North Carolina students who are attending either in-state or out-of-state colleges and universities are eligible to apply for a Bankers' loan through their college student aid officer.

In addition to the Bankers' Plan, the Foundation also administers the James E. and Mary Z. Bryan Student Loan Plan. The funds for this Bryan student loan program come from the estates of James E. and Mary Z. Bryan.

In a statement issued by Governor Dan K. Moore on February 24th, named the College Foundation, Inc., as the major eligible lender in North Carolina to work in cooperation with the new Low-Interest Insured Student Loan Program under Title IV B of the Higher Education Act of 1965, which was signed into law by President Johnson on November 8, 1965.

The North Carolina guarantee agency, which works in conjunction with this Higher Education Act program is the new State Education Assistance Authority, which is operated in connection with the State Board of Higher Education and under the direction of Dr. Howard Booser.

Under the program operated through the State Education Assistance Authority, loans will be available up to \$1,000 per year for undergraduates and up to \$1,500 per year for graduate students, with overall limits of \$5,000 for undergraduates and \$7,500 for graduate students.

Governor Moore recently named seven persons to the first board of directors of the State Education Assistance Authority, which only serves as an insurer of loans made to eligible lenders. Funds for such loans are to come from the federal and state governments and from non-governmental organizations such as banks.

Governor Moore pointed out that North Carolina is ahead of other states in this student aid program due to the fact that its College Foundation, Inc., has previously been organized and is in readiness to work with the student aid plan. Loans to individual students are made upon recommendation of student financial aid officers in the individual colleges.

Any bonafide North Carolina resident attending an eligible institution in or out of state on a full undergraduate level is eligible for loans under the program. An entering freshman is eligible when he has been accepted for enrollment at any eligible institution, and an upper-classman is eligible if he is in good academic standing at an eligible institution.

Student may borrow up to \$1,000 per year and up to \$5,000 for four years, including summer schools, for undergraduate study. Graduate or professional students may borrow up to \$1,500 per year and up to an aggregate of \$7,500. No endorsers are required for notes for those over 17 years of age.

Interest is charged at six per cent on the unpaid principal balance, but the Federal Government assists with the interest on loans to students from families with less than \$15,000 per year in one-parent families. Interest ceases to accrue after a student ceases to carry a full work load at the college he attends, with repayments on a monthly basis and to total \$360 per year or more. Students desiring such loans may contact the student aid officers at the college they attend.

Guilford Volley Ballers Invade Elon For Game

An intercollegiate volley ball contest with Guilford College, which was held in the Elon Alumni Memorial Gymnasium on Monday night of this week, and a women's intercollegiate tennis clinic to be held at the University of North Carolina in Chapel Hill tomorrow are high lights of the current program for the Women's Athletic Association.

The volley ball contest will feature twelve Guilford girls to the Elon campus, who were guests of the Elon girls at dinner as well as for basketball, and the tennis clinic at Chapel Hill is expected to take a goodly group of Elon girls to the University campus.

The WAA campus basketball league, which includes seven teams, swung into action with opening round games on Monday of this week. There will be a break next week due to the annual antique show in the Elon gymnasium, but action will be resumed after that event and continue until a campus championship is crowned.

West Carolina

(Continued From Page Three)

final five minutes of the game, but the Elon shooters were never able to make the crucial outside shots against the Catamount zone. And Western Carolina pulled away in the closing moments to the final 87 to 75 score.

The line-ups:
Pos. Elon (75) West Carolina (87)
F—Such (2) Brintnall (2)
F—Bowes (10) Gilvert (6)
C—Goedeck (31) Wittman (10)
G—Atkins (17) Logan (31)
G—Denhart (7) McConnell (28)
Half-time: Western Carolina 42, Elon 37.

Elon subs—Van Lear 4, Davis 2.
Western Carolina subs—Bloom 8, Weaver 2, Moore.

IN RECITAL

PROF. GUY FEATHERSTONE

Music Prof Gives Recital On Campus

Prof. Guy Featherstone, pianist, a member of the Elon College music faculty, was heard with praise in a piano recital in Elon's Whitley Auditorium on Tuesday night, February 22nd, when he was presented by the music department in one of its annual series of faculty recitals.

Prof. Featherstone, who joined the Elon music faculty for the first time last fall, played the college's beautiful new Steinway concert grand, which was dedicated only last year with a recital by Fred Sahlmann. The recital was followed by a reception in the parlor of West Dormitory.

The recital program included Haydn's Sonata No. 62 in E Flat Major; Prelude, Chorale and Fugue, by Franck; short pieces by the works of Brahms, Debussy, Bartok and Rachinoff and the 3rd Sonata of the contemporary Russian master, Serge Prokofiev.

A native of North Carolina, Prof. Featherstone was educated at the Oberlin Conservatory of Music in Ohio, where he studied with Emil Danenberg and Jack Randunsky; at Florida State University, where he earned the master's degree while studying with Carlisle Floyd; and at Northwestern University, where he has engaged in doctoral studies.

Founders Day

(Continued From Page One)

held at 10 o'clock, and the 11:40 classes will meet at their usual hour or immediately following the Founders Day convocation in Whitley Auditorium.

The Founders Day observance is held each year in the early part of March, commemorating the issuance of the Elon College charter by the North Carolina General Assembly, an event which took place on March 11, 1859. Construction of the college plant began soon after that date, and the college opened its doors in the fall of 1860.

Good Students

(Continued From Page Two)

the organization. He is willing to serve on committees and give of his time to building the group.

He is concerned about the college and the campus and tries to build a stronger campus community through student government and other campus activities.

The good student may also be found on the athletic field, serving as a professor's assistant or engaged in some sort of employment to work his way through college. Often he may be married and supporting a wife or rearing a family, while attending classes.

To these students should be offered the greatest respect and regard for they have found the real meaning of college and of life.

—CLIPPED

WINTER FOOTBALL

(Continued From Page Three)

include Dave Garth and Dwight Rayfield at tackle, Vernon Walker at guard, Tom Rodney at Quarterback and Dempsey Herring, Bucky James and Sheldon Batchelder, halfbacks.

A pair of the veterans have switched positions in the off-season drills, with Gary Karkiker moving from tackle to guard and H. L. Robinson moving from quarterback to halfback. Lloyd Kanipe and Lee Johnson are working at both center and guard and may see duty at either post.

Christian Scratch Sheet

(Continued From Page Three)

The column from the most recent issue of the Maroon and Gold mentions the control of coaches over athletes. If you call getting textbooks for tutoring an athlete, seen some students at Elon follow I'm all for control. I have low certain professors around and imitating their actions and trying to give a pseudo-sophisticate appearance to their fellow students. But, of course, such control by those professors is not frowned upon, because it is intellectual control.

Many people fail to realize that a good athlete usually makes a good man. Bill Bradley, of Princeton, was an All-American, and also a Rhodes Scholar. Supreme Court justice "Whizzer" White was an All-American football player at the University of Colorado. Many of our contemporary military men were athletes while in college, and even here at Elon we have professors in the English and math departments who were excellent athletes while in college.

Right here at Elon one can find instances of former Elon sports stars who have won high acclaim in academic fields. Dr. William Blackstone, now at the University of Georgia, who has gained eminent rank in the field of philosophy and education, is the same Bill Blackstone who played three sports at Elon in the early 'Fifties; and Dr. Marvin Moss, at North Carolina State, who has won repeated fellowships and honors in nuclear physics, went on from service as an Elon quarterback. The list would be practically endless of such Elon athletes who have gone on to eminent records and fine public service.

To put the entire question on a personal basis, I would say that having taken as long as I have to earn my degree gives me very little right to criticize any other student's scholastic ability, so I have kept away from this stand as much as possible. With Elon's high percentage of students on probation, I feel that there are very few students who can afford to criticize the academic abilities of the athletes without criticizing themselves first.

Sports Shorts

The Elon College basketball season came to an end on Wednesday night, February 23rd, at the Lexington YMCA, where the High Point Panthers defeated the Christians 89 to 75 with a strong second half effort. After holding a slim two-point lead at the half, the Elon Christians fell victim to a hot-shooting effort by High Point's Gene Littles in the second half. . . . I feel that next year would bring better fortunes to the Christian cagers, who should benefit from this year's experience.

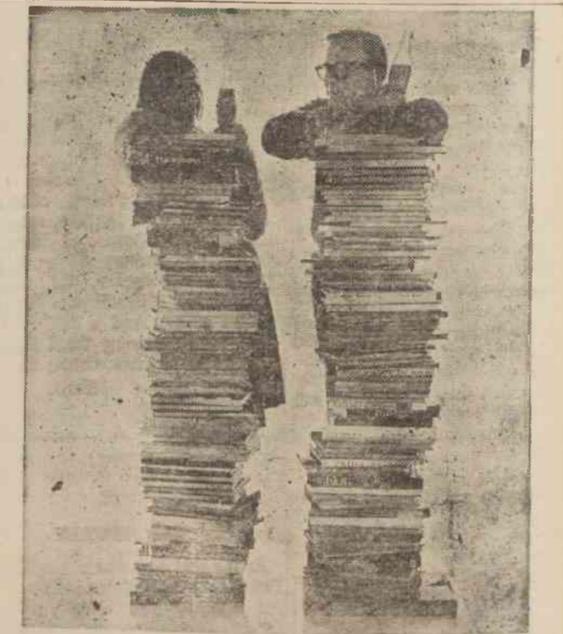

The Christian football team has started its spring grid drills in good fashion, with many lively scrimmages during the past two weeks. . . . Elon's baseball team which always shows a good record, is ready to start its 1966 campaign in the middle of March. . . . and finally here's congrats to Henry Goedeck, Elon's fine freshman cage star, who was one of three freshmen to make the Carolinas Conference all-star team this year.

Legislature

(Continued From Page One)

Establishing a Consumer Affairs Commission and deletion of the jury trial system in all civil cases in North Carolina courts. Other bills discussed were for inspection and grading of rest-room facilities, an investigation of the Ku Klux Klan, establishing compulsory state-supported kindergartens, and a proposal to change the state legislature to a unicameral body. A resolution was passed to support free speech at institutions of higher education in North Carolina.

The eleven delegates who represented Elon College at the State Student Legislature were Jerry Cameron, of Sanford; C. V. May, of Burlington; Sharon Branch, of West Palm Beach, Fla.; Gail Campbell, of Ho-Ho-Kus, N. J.; Carol Keith, of Reidsville; Don King, of Burlington; George Scott, of Suffolk, Va.; Leon Tew, of Virginia Beach, Va.; Paulette Westphal, of Hampton, Va.; Fred Moon, of Burlington; and Noel Allen, of Burlington.
