

# Elon Sends 10 Students To State Student Legislature

By PHIL LARRABEE

A ten-member delegation will represent Elon College in the thirty-third annual State Student Legislature to be held in Raleigh March 4- March 7.

The participating members of the Elon delegation will be Gail Fonville, a senior; Terry Harker, a freshman; Bob Lane, a junior; Phil Larrabee (chairman), a senior; Kathy Lawson, a sophomore; Frank Lyon, a junior; Craig MacCreary, a junior; Sally O'Neill, a senior; York Poole, a sophomore; and Chris Walsh, a sophomore.

North Carolina's model Legislature is the oldest of the kind in the country. The first session was held on Nov. 12, 1937 and only once since then, in 1947, have the annual assemblies been interrupted.

The State Student Legislature is conducted in the same manner as the State General Assembly. Two members from each delegation of the participating schools are placed in the Senate, along with one alternate. A proportionate number of delegates from each school are placed in the House, along with a proportionate number of alternates. The legislative sessions are held throughout the day for three days, and this is when legislation is presented to both houses, debated under strict parliamentary rule, and voted on.

Since the conception of the State Student Legislature a total of 43 per cent of all the legislation introduced has been enacted into law by the North Carolina General Assem-

bly. This overwhelming percentage speaks well of the caliber of the legislation presented and also of the importance of the Student Legislature as an outlet for student opinion.

The legislation Elon will present is a bill entitled "An Act to Encourage Attendance in Institutions of Higher Learning by Providing a Scholar Incentive Program for Residents of North Carolina." The nine page bill deals with setting up a state board to allocate funds, on a percentage basis, to those students who wish to attend private institutions of higher learning but cannot afford to do so. The bill's effect would be to allow students to attend the private institution of his choice and also to take the strain of over-crowding off the lower tuitioned state-supported institutions.

Awards are given to the school presenting the best legislation having the best delegation, and the best individual speaker. The Elon College delegation is striving to obtain its share of these awards.

## WORTH TALKING ABOUT

"A typical new car coming off the assembly line today produces about a third of the carbon monoxide and hydrocarbon pollution produced by a car back in 1962, before the first pollution control devices were put on all new automobiles across the nation. This advance, though recent, is already beginning to have an effect.

The Emanons bone up for their tour of North Carolina and adjoining states.

In Los Angeles, for example, where pollution controls were introduced somewhat earlier, the number of smog days per year is declining, and levels of hydrocarbons and carbon monoxide are on the down-grade. Over the next several years, over-all reductions in levels of these two pollutants will be

substantial in the congested urban areas where problems now exist, because many of our older cars, without controls, will be phased off the roads and replaced with newer, low-pollution vehicles."

—Frank N. Ikard, President

American Petroleum Institute

## MARCH BIRTHDAYS

March 1, 1932—The twenty-month old son of Colonel and Mrs. Charles A. Lindbergh was kidnapped from his bed in the Lindbergh home at Sourland Mountain, near Hopewell, New Jersey.

# THE WINTER TERM

Members of a P.E. class plod upon the snow at Sugar Mountain during winter term. Beginners were given three-foot skis and advanced to larger ones as their ability progressed.

Harold Perry and Gary Morgan at Marche aux Puces (Flea Market) in Paris.

Chris Fisher prepares colorful icing for her metallic ornaments during metal-enameling class.

Tom Ronman and Randy Spencer at the Tower of London. Behind them looms the famous Tower Bridge.
