### Ebony Reflections

#### FREEDOM JOURNAL

1827 Freedom Journal was the first Black newspaper, published in New York.

#### FREE SCHOOL

1787 the first free school, "The African Free School," operated in New York City.

#### PHOEBE FRAUNCES

1776 - Without the deed of a Black girl, America's history might be different. The girl was Phoebe Fraunces, a waitress in a tavern in New York. Her lover, in an attempt to head off the Revolution, gave her a dish of poisoned peas to serve George Washington. Instead she warned Washington and threw the peas into the yard. Chickens ate the peas and fell dead. Her lover, Thomas Hickey, was hanged before 20,000 onlookers for this attempt.

#### GRANVILLE T. WOODS

1884 - Granville T. Woods patented many devices. They began with a steam boiler furnace in 1884, and included two electrical brakes, several kinds of telegraphing apparatus, at least four railway improvements, a battery and a tunnel constructed for electric use. The electrical controller system devised by Mr. Woods was used on the Manhattan Elevated Railway. It is believed that he patented more than 25 electrical devices.

#### EDUCATION IS...

"Education consists of not only in the sum of what a man knows, or the skill with which he can put this to his own advantage. In my view, a man's education must also be measured in terms on the soundness of his judgment of people and things, and his powers to understand and appreciate the needs of his fellowman, and to be of service to them. The educated man should be so sensitive to the conditions around him that he makes it his chief endeavor to improve those conditions for the good for all."

-- Kwame Nkrumah
