

Debra Jones: New Face In Student Center

by Shirley Long

Miss Debra Jones, a native of Fayetteville, has recently replaced Mrs. Robinson who is away on maternity leave. Miss Jones is a 1975 graduate of E.E. Smith Senior High School. She attended LaFayette Junior College where she received her Associate Degree in Secretarial Science.

Miss Jones worked as a secretary for the Downtown

Fayetteville Association and also worked as a secretary for the Placement Office at Fayetteville State University.

Miss Jones said that working for the Student Center is very rewarding and that it would benefit her in the future.

The Student Center workers feel that Miss Jones is really an asset to the University and handles her responsibilities very well.

Personal Profile Of Financial Aid Office New Employees

by Beverly Edge

Mrs. Candy J. Jones, a native of Maxton, North Carolina, now resides in Fayetteville with her husband Patrick O. Jones and their three year old daughter Patrice O. Jones. Mrs. Jones attended Pembroke State University where she graduated Cum Laude receiving a B.S. Degree in Business Management. She began her first day of work here at FSU on January 8, 1979 working in the Financial Aid Office under the directorship of Mr. Harold L. Nixon.

Mrs. Jones commented, "My job is exciting and there is never a dull moment."

Mrs. Jones was previously employed at the City Hall of Fayetteville in the Department of Finance. Working as a Work Study Coordinator must really be a challenge for Mrs. Jones.

Ms. Brenda Watford is a native of Ahoskie, North Carolina and resides in Fayetteville. Ms. Watford began her higher education here at Fayetteville State in 1973 where she graduated in 1977. She was an active member of Pi Omega Pi Honorary Business Education Organization, an active member of Phi Beta Lambda and graduated Cum Laude.

Upon graduation, Ms. Watford was employed at the Institutional Research Office as a clerk typist. At the present time, Ms. Watford is a Financial Aid Secretary.

Film showings will begin at 8.

No admission will be charged.

Each film will be followed by a panel discussion.

Sponsored by The Cumberland County Public Library in cooperation with Fayetteville Technical Institute and Fayetteville State University.

Godfather

Expands

The hottest firm in the world of fast-food at the moment appears to be Godfather's Pizza. The firm, which began in Omaha in 1973, grew to 26 stores in 1976, 88 in 1977, and reached 187 at the end of 1978.

Sales per store averaged \$307,000 in 1977, beating out Pizza Hut's average of \$179,000 per location.

The firm's advertising budget is nearly \$1,000,000 yearly.

St. Anthony Hotel in San Antonio, Texas.

Pi Omega Pi is a national business teacher education honor society which holds its national convention every two years. The organization includes in its purpose to create and encourage interests and promote scholarship in business education.

An initiation service is being planned for prospective members of Epsilon Lambda Chapter of Pi Omega Pi at FSU in March.

SEXPLANATIONS

By DR. WAYNE ANDERSON
Campus Digest News Service

Q. Which is the most harmful, syphilis or gonorrhea?

A. Some years ago I would have said, "Obviously syphilis since it's the one that can kill you." Today I would say it's a judgment call and my present judgment is that gonorrhea is the most harmful.

Syphilis is life-threatening, and the fourth stage, which develops two to thirty years after the disease has been contracted, can affect any organ in the central nervous system or cardiovascular system. It can cripple; it can kill. But it is no longer the great danger it once was. It affects probably 75,000 new cases a year, but it is easily treated with penicillin and the dose required is the same as that required when penicillin was first used. The spirochete has not developed any immunity to penicillin. Even among those persons who are treated, 50 percent recover spontaneously, 25 percent are asymptomatic, that is, they have the disease but it is controlled by the body, and 25 percent develop serious symptoms.

Gonorrhea on the other hand is usually not life-threatening and is more or less restricted to the genitourinary area, which includes your internal sex organs. So far not so bad, but consider that it effects probably 1,500,000 new people each year. Also consider that the gonococcus is constantly finding new ways to avoid being killed by penicillin so

that we now need to give those affected a dosage which is many times that which originally cured the disease. New strains are constantly being developed, and while there have been stories for years about vicious strains that were totally out of control, a sufficiently high dosage of penicillin was known to cure all known strains. Now there is finally a report of a strain that does successfully resist penicillin.

The disease, while painful in men, is rather obvious and the victim knows that he must seek treatment. Serious complications are rather rare. In women, on the other hand, there may be no symptoms; she only knows she has gonorrhea if her sex partner reports that he has contracted the disease from her. Diagnosis and treatment are also much more difficult in women; for example, the dose of penicillin is twice that given to men. The two major complications that women develop are inflammation of the Bartholin's glands and inflammation of the Fallopian tubes. Both can require surgery and the latter can result in chronic invalidism and sterility. At one time, by the way, 33 percent of the cases of blindness in children were the result of gonococcal infections which the newborn acquired from its mother.

Neither disease should be treated lightly. They both have their dangers, but the sheer number of gonorrhea cases and its developing resistance to treatment make it the more harmful disease at the moment.

MUSICAL BRIEFS

by Mary "Bunny" English
Hamilton Bohannon

Once the lights are out and everyone has gone home, most musicians part from their music. Bohannon and his music are never parted. Mr. Bohannon has a degree from the University of Louisiana. He plays several instruments and writes much of his own material. He doesn't like the word "Funk." Music is supposed to make people happy, he feels. Funk seems to suggest to him something sweaty.

John "Longhorn" Mosely
John is one of the bright

young men of today. He is of special interest to Fayettevillians because he has relatives here.

John's feeling of music comes from the fact that he has studied at a leading conservatory in New York. He is now putting that study into action and is currently doing an extended tour with Hamilton Bohannon.

"Louis Armstrong and anyone else that blew a horn were my idols. I've been playing since I was six years old. Hopefully, I'll have my own release out by summer," Longhorn commented.
