Funeral services were conducted August 6, 1983 at Matthews Memorial Baptist Church in Washington, D.C. for Dr. Cleophus C. Hatcher, Vice Chancellor of Student Development at Fayetteville State University.

Hatcher received a Bachelor of Science Degree in Health and Physical Education from West Virginia State College in 1949. He continued his education at George Washington University receiving his Doctorate of Higher Education.

Dr. Hatcher has held positions in teaching, coaching, and administration at

several universities throughout the east coast including Cheyney State College, Howard University, and Morris College. He was also a member of the Omega Psi Phi Fraternity and many other community organizations.

Charles A. Lyons, Chancellor at FSU, remembers Dr. Hatcher as "a valuable colleague and a good friend who was dedicated to education and students."

Hatcher is mourned by his wife, Marion Hatcher, six daughters, and a list of relatives and friends.

Dormitory Rearrangement

By Cheryl Brown

Fayetteville State University students have just about adjusted to the modifications in Fayetteville State University dormitories.

Five changes in dormitory accommodations were enforced beginning this 1983-84 school term. Bryant Hall, which was a female dormitory, is now a male dormitory, housing mostly freshmen. New Residence Hall, which housed both male and female students, is now a female dormitory. Hood Hall, once a female dormitory then changed to a male athletic dormitory, is now a female dormitory. Williams Hall, formerly housing for male athletics, now accommodates female athletics, and Smith Hall has reopened.

There are approximately 45% male and

55% female students living on campus, according to Mr. Harold Nixon, Acting Vice Chancellor Student Development. The new arrangement of the dormitories is an experiment directed towards the betterment of life on-campus. By arranging the dormitory housing in this manner, the campus life development administrators hope to attract new on-campus students, and to distract unwanted outside visitors.

Male students who were former occupants of Hood and Williams Hall, stated that they were angry because those dormitories were not renovated until the decision was made for those dormitories to accommodate female students.

In the next issue *The Voice* will cover students opinions of life on Fayetteville State University's campus.

Former Instructor Retires

John A. Hollingsworth

Photo by Rosemary Byrd

System made possible by Mr. Hollingsworth who also encouraged the use of computers in the city schools. The Fayetteville school system began with 55 computers and 14 more have been added this year. Along with the computers came orientation and familiarization of computers for teachers. It was also through the proposal of Mr. Hollingsworth that computer, math, and reading labs have become available asset for the students.

Mr. Hollingsworth earned his B.S. degree at A&T University in the field of agriculture, and his M.S. in biology at North Carolina Central University. Among places of his further studies are North Carolina State University, Ohio State University Radiation Biology Institute, Russian Institute at San Francisco State College, Cornell University, and East Carolina University. While in the military he attained the rank of captain. He was a commissioned officer in the Army at a time when Blacks were seldomly able to obtain commissions in the armed services, he served 11 years. Presently, he serves as a radiological defense officer for the Fayetteville Cumberland County Defense Agency.

After encouraging others to strive for success, he is now enjoying his retirement while preparing for a new project. Mr. Hollingsworth has written several articles about educational revision and administration.

The Voice cites Mr. John A. Hollingsworth as a positive Black male role model, and expresses appreciation for his concern for higher education.

Cooperative Education Program

By Marion Crowe

The Cooperative Education Program at Fayetteville State University is a program of learning in which off-campus work experience is made an important part of the student's educational program. The university utilizes an alternating plan whereby students are involved in two work experiences. According to academic studies. Participation in the Cooperative Education Program is voluntary and open to students of any academic major who have the approval of their academic advisor. All academic credit is arranged through and awarded by the student's major division. The jobs provided are regular paying positions directed at helping the students finance their education.

To ensure the work experiences relate to the students' academic major, all job descriptions are submitted to the Cooperative Education Program Coordinator and approved by the academic

division chairperson. Students must enter into contacts with their major's division defining the objectives to be achieved during the work experience. Evidence of accomplishment must be provided by the student and submitted to the appropriate department advisor for evaluation. Work periods will generally correspond to the university's academic calendar.

There are many academic majors offered at the university. For detailed information on these areas, the student should contact Ms. Georgia Sibbie in Room 114 Co-op office in the Administration building.

The Cooperative Education Program offers students many opportunities by placing the student in actual off-campus jobs related to their academic field of study; the student is given an opportunity to increase his chances for permanent employment after graduation.

New Awards Program For Summer Research In The Humanities

The National Endowment for the Humanities has announced a new grants program for individuals under 21 to carry out their own non-credit humanities research projects during the summer of 1984. The Younger Scholars Program will award up to 100 grants nationally for outstanding research and writing projects in such fields as history, philosophy and the study of literature. These projects will be carried out during the summer of 1984. The application deadline is November 15, 1983. Award recipients will be expected to work

full-time for nine weeks during the summer, researching and writing a humanities paper under the close supervision of a humanities scholar. Please note that this is not a financial aid program, and no academic credit should be sought for the projects.

A booklet of guidelines and application instructions should be available for photocopying at the campus student placement office, or write to: Younger Scholars Guidelines, Room 426, The National Endowment for the Humanities, Washington, D.C. 20506.

By Cheryl Brown

Mr. John A. Hollingsworth, a former biology instructor at Fayetteville State University 1963-64 (summer and night courses) has retired from the position of science and mathematics coordinator for the Fayetteville City Schools.

Mr. Hollingsworth is responsible for several modifications in the Fayetteville school system. His concern with the updating and revision of curricula and educational administration is what provoked him to make proposals for several educational grants of which most have been awarded. Close to 4 million dollars have been put into the Fayetteville City School
