Life Answers

By C.W. Harrison

Life is your own answer. No, I can not tell what life is in one a To cherish life is your or my own deci To me life comes second to time. It's undecided for me. For me life is everyday: It's life when a baby is born plus joy. I share it with whoever wants to share I hope I will never have to take away Time is a life span. Love will always be life. Life could be any of these or all. Life is what you make it!!!
