## The Assessment Resource Center

The Assessment Resource Center (ARC) is a Title III funded activity which provides a variety of services to the University community. The major goal of the program is to increase retention rates for users of ARC services by offering assistance in major/minor selection, career exploration and preparation, overcoming test anxiety, test preparation, setting realistic scholastic goals, and in determining outcomes of exposure to courses of study.

### Where to Find the ARC

The Assessment Resource Center (ARC) is located on the second floor of the William Collins Administration Building. ARC services are free to all FSU students and available to interested others for a minimal fee. Appointments to use ARC services may be scheduled through the Office of Student Support Services.

Visit the ARC, just to say "hello", or if you need help with test preparation, career planning, finding a major, academic skill level, overcoming test anxiety—or to gain more information about your relationship with others as well as greater self understanding.

### Why Should You Use The ARC

**Skill levels** may be raised through the ARC. A variety of instruments can be administered to help you with matters as diverse as choosing a college major to analyzing your personality through color preference responses. State-of-the-art technology via a microcomputer laboratory provides students and other ARC users with the capability of determining their level of preparation for college work in English, reading, and mathematics.

**Test Preparation and Effective Study Skills** may be enhanced that show how to prepare for tests, including tips for studying and methods of remembering material more effectively. Test preparation software, including SAT exam preparation series, GMAT preparation, GRE and CLEP preparation are available for use in the ARC.

**Resource Materials** such as test manuals, measurement journals, periodicals, statistics software, specimen sets of tests, etc. are housed in the library component of the ARC for use by student involved in significant studies or research in their areas of specialization.

**3D Career Planning** to help you decide what type of job you want, determine the skills you need, and discover ways to get those skills may be accomplished in the ARC . . .

### ARC SERVICES:

**For Students**  
Aptitude Testing  
Interest Assessment  
Personality Assessment  
Learning Style Identification  
Prescription for Remediation

**For Instructional Support**  
Objective Test Scoring  
(Limited basis)  
Descriptive data analysis

**For Community**  
Career Assessment  
Interest Inventories  
Computerized Test  
Preparation (SAT, GRE, GMAT, CLEP)

For more information, call or stop by  
Student Support Services  
114 Administration Building  
(919) 486-1301 or 486-1204

### To Music Faculty

The next recital will be held on Tuesday, October 24, 1989 at 7:00 p.m. Please have all recital information to Ms. Bookhart no later than Friday, October 29, 1989. Thank you for your cooperation.

### NEXT ISSUE:

All you need to know about Financial Aid

### Coronation Ball

#### BY STUDENT ACTIVITIES OFFICE

Students' response to the "university wide" Coronation Ball was excellent. I'm certain everyone is looking forward to a wonderful evening of JAZZ as we listen to the beat of Mellow Madness V.

Please be reminded that you must:

1. Present your invitation at the door (no one will be admitted without an invitation) and
2. Be properly attired  
Ladies: gowns/T length dresses  
Men: dark suits/tuxedos

### Alpha Kappa Mu Membership

Alpha Kappa Mu National Honor Society promotes high academic and personal achievement as well as development and endeavor in all fields of knowledge and service. The society is open to junior, senior, and graduate students in all majors.

The Rho Beta Chi Chapter of Alpha Kappa Mu is currently in the process of identifying eligible students for possible membership. This honor society requires the highest GPA of any on campus: a minimum (GPA) of 3.3 for undergraduates and 3.7 for graduate students with at least 15 hours.

Due to the factors beyond our control, it is impossible to contact all meritorious students. If you feel that you qualify but do not receive an invitation, please feel free to attend the interviews. These will be held in Butler Room 211, October 24-26 between the hours of 2:00 and 4:00 p.m. each day. The induction ceremony will be held in the afternoon on 7 November 1989.

### Anderson Receives Kappa Delta Pi Award

Congratulations to Raymond G. Anderson, a junior at Fayetteville State University, who is this year's first recipient of Kappa Delta Pi's National Teacher Examination Incentive Award. As one of KDP's continuing programs, the NTE Incentive Award offers cash for scores of 670 or more on the Professional Knowledge portion of the exam. Anderson, an elementary education major, will be awarded \$35 for his score of 676. This score also ranks him in the 95th percentile nationally. We are all proud of this commendable effort and we hope to present more awards such as this one in the future.

For more information pertaining to the NTE Incentive Award or any of Kappa Delta Pi's programs, contact Dr. C. I. Brown or Dr. Cathy Butler-Kosterman.

### Can You Name The Cat?

By now, I'm sure everyone has heard of or has seen the cat that is always loitering around the Cafeteria. Each day, around lunch and dinner time, the cat makes its debut

to swindle students out of some of their left over from the cafeteria. Somehow, the cat has made a great name for himself.

I know this kitty has been given various names by several groups, but I think it's time for the students at Fayetteville State to select a name for our friend the cat.

I can imagine all the times this cat has been called "Tom," "Selvester," and "Black Jack." Since this cat has given us many fond memories to cherish, why not give him a name so that everyone will know you are referring to Cafe's famous cat.

Whoever provides the best name will receive instantaneous popularity, and will also have his/her picture printed in the *Bronco's Voice*.

So, what are you waiting for? Write your name, address, and phone number with the suggested name of the cat on a 3x5 card to the newspaper office in the Student Center by Tuesday, October 29th.

The winner of the contest along with the name of the cat will be printed in the next issue of the *Bronco's Voice*. Good luck to the lucky candidate!

### Bohemian's on Halloween Eve

#### BY STEPHEN T. WARD

A local community of artists and writers has been established in Fayetteville known as the Bohemians. On October 30th, they will present art works and do readings in the spirit of Halloween. The group is van guard and unpredictable. This should be a strange-exciting experience. So, you have the taste for the unusual or unexpected, come share Halloween Eve with the Bohemians at the Student Center at 7 p.m.

### Introduction to Biomedical Research Encourages Minority Students to Pursue Science Career

Are you an academically talented minority student in your junior or senior year? Or in your first year of graduate or medical school? Are you interested in a career in biomedical research?

The National Institute of Allergy and Infectious Diseases (NIAID) in Bethesda, Maryland, has an initiative called the Introduction to Biomedical Research Program that is specially designed to acquaint academically talented minority students to career opportunities in the broad field of biomedical research.

NIAID, one of the 13 National Institutes of Health (NIH), conducts and supports research to study the causes of allergic, immunologic, and infectious diseases, and to develop better means of preventing, diagnosing, and treating these illnesses.

"This program offers minority students from across the country an in-depth and intense three-day introduction to NIAID-NIH biomedical research," said Vincent A. Thomas, project officer of the program. "This initiative grew out of the Institute's concern about the underrepresentation of minorities in the scientific pool. Our goal is to increase the number of minority biomedical researchers."

Students—who are provided per diem and round trip

tickets to the Bethesda campus—will have the opportunity to participate in series of lectures, interview, and tour the renowned NIH clinical Center, the world's largest biomedical research facility. They will also discuss, face-to-face with scientists, current research initiatives and advances as well as career concerns and possible summer employment opportunities.

Participants will also have the opportunity to apply for summer positions in the NIAID Division of Intramural Research, and thus provide them with general exposure to research career paths and further their knowledge and understanding of biomedical research, and the types of positions available at NIH. Approximately 55 students will be selected for the Feb. 11-16, 1990, program.

Deans and faculty may recommend students with a 3.0 or better GPA. Selection is based on faculty recommendations and personal and academic achievements. If you are interested, you should contact the dean or chairperson of the biology or chemistry department of your school.

The application packet must be received from the dean or chairperson at NIAID no later than Nov. 20. Final selections will be announced by Dec. 13.

## Broncos: Moving Onward, Forever Upward

## Classified Ads

Is there something that you would like to buy or sell? Something you want to say to someone? Looking for a soulmate, helpmate, or roommate? If so, put it in the classifieds. We will print any message or ad, within the limits of good taste, for a nominal fee. Just bring it by the *Broncos' Voice* office in the Student Center. The *Broncos' Voice* staff reserves the right to edit for clarity and taste.

**Happy Birthday, Renita!!!**  
From Boo Boo, Keisha, and the gang.

Shelley,  
Let's please get back together!  
I miss you!  
Teddy Bear

Kimberly,  
How about that date?  
Michael

Congratulations, Nevette, on passing your test (finally).

LORDY!  
Pamela is 40!

**Have a safe and happy Homecoming.**
