

Global warming. Destruction of the rain forests. Toxic waste. These aren't the legacies we wanted from the "environmental" President. Urge George Bush to attend the U.N. Earth Summit in Brazil in June. Right now, the United States is the only major industrial power refusing to do its part. Ask the President to stop America's role as leading producer of greenhouse gases. Tell him to support the global treaty for reducing carbon dioxide emissions, ban the exportation of toxic waste, and save the world's rain forests. The President is the only person who can effectively lead the struggle for our planet's future.
