**Criminal Seduction** by Darian North

Love, murder, and incredible twists await the readers who fancy a riveting page-turner. Again, I was unable to put yet another book down before going into slumber land at night. In the beginning, I was thinking this was just another predictable murder paperback, but I found the book far more compelling than any murder mystery I'd ever read. The main character, Owen Byrne, is an aspiring writer who sets out from Kansas to New York City to write a true-crime book about a lady

who is accused of murdering her husband, a famous painter. Like me, I'm sure every reader will guess that this country boy, who had never seen an African-American before, would fall in love with the defendant, Lenore Serian. However, it is not an easy love affair, and not one that happens quickly. Over the course of his love affair and the trial, many mysteries unfold, and the reader is carried into one incredible dimension of the murdered man's life. In fact, don't be surprised at how many times you find yourself thinking that it was safe to say that you had figured it all out, when everything takes another turn in the road.

**Criminal Seduction** is a definite must-read for those interested in a murder thriller with just a touch of love and a lot of sexual interludes. Many of the facets of this book will disgust you, make you angry, and make you happy that you finished that one terrifying chapter. Then there are others that will make you smile and long for a sequel. The secrets unfolded in this book will keep you on the edge of your seat waiting to turn the pages faster and faster until you're at the end, but don't cheat, because you might miss a lot of mind-boggling and juicy details.

**Criminal Seduction**, published by Signet in 1994, can be purchased any-

where paperbacks are sold. New, it retails for about \$6.00, but can easily be found at a second hand bookstore for less than \$2.50.

**Carnal Innocence** by Nora Roberts

Nora Roberts outdoes herself with this book. The title is perfect, combining "carnal," lustful or crude bodily pleasures and appetites; and Innocence, a little town in Mississippi whose inhabitants had only read about such heinous sexual crimes being committed in larger cities. All of a sudden it was the women of Innocence who were afraid to walk the street alone. No woman knew who to trust, but many of them, at least the ones murdered, knew and trusted the handsome and smooth talking Tucker Longstreet. One of the richest and most sought-after bachelors in town, Longstreet was at the top of the list of suspects. However, Caroline Waverly, a famous concert violinist, refused to believe that he was a killer; a womanizer, but not a killer. Slowly, Caroline also began to trust Tucker and was drawn into the murders, first by finding a body, and then by befriending the murderer.

**Carnal Innocence** guides you slowly through the confused life of Caroline, who came to Innocence for rest and relaxation, but found love and
