Washington-Rep. Jim Kolbe has proposed that the nation consider carrying around dollar coins instead of the dollar bills. Although this is not the first time the proposal has been issued, this is the first time the Clinton Administration says it is actually open to considering a new dollar coin.

Kolbe suggests that the proposal is right on time given the fact that the supply of Susan B. Anthony dollars is running low, partly because the U.S. Postal Service and some metropolitan transit authorities now use vending machines that take the dollar coin instead of dollar bills. The proposed dollar coin would possibly be a gold-colored one.

Despite reservations by Treasury Secretary Robert Rubin, minting a coin remains cheaper than printing a bill in the long run because coins are more durable. The Congressional Budget Offfice has estimated the savings at \$400 million to \$800 million over three decades.
