Aquarius (January 20- February 18)

Your new found talent may be the break you need to succeed in this world. Keep focus on your goals and build you support system, you will need them on your strive to success.

(Love) - Of course love is in the air, but you'd rather play single-n-mingle. Nothing is wrong with me time, and having casual friendships.

Pisces (February 19 - March 20)

Good things are coming your way. With patience everything you have your mind set on will soon be at your feet. Be sure to share your good fortune with those who have always been in your corner.

(Love) - Dating is not new, but it seems so foreign to you at the time. Try asking friends and family for advice.

Aries (March 21- April 19)

You are ready to party and let loose. With the month you have been having, no one blames you. Go out, have fun, and live it up. You only get one life, enjoy it. However, be sure to keep safe, you do have work to get done.

(Love) - You really want someone to love and be happy with. Problem is you can't find them; so how about waiting and letting that special someone find you. Anything worth having is worth waiting for.

Taurus (April 20 - May 20)

Life always seems to give you what you want. Right now you are at ease, but be prepared for the next upcoming events because your lemonade is almost gone, and life always throws you more lemons.

(Love) - Missing someone you once loved? Maybe you should give him or her a call, set up a date, and pour your heart out. You never know exactly what that person has been feeling.

Gemini (May 21- June 21)

All your hard work will pay off in the long run. Fake a smile, put on your happy attitude and ignore those who are trying to bring you down. The fight is not over, and those who last, laughs last.

(Love) - Sometimes going back to the beginning and being friends can make for the best romantic relationship you've ever had. Remember boy/girl friend ends with friend.

Cancer (June 22 - July 22)

You played the cards you were dealt, you won, and bet all you had. Now with a new hand, you lost, and realized maybe you shouldn't have stepped on those toes you may need to dig you out of your jam.

(Love) - You have to let go, and move on. There's nothing like meeting someone new and experiencing new love.

Leo (July 23 - August 22)

You are strong and always win. Some battles are not yours and you need to

learn how to choose which ones to fight and which ones to let go. Backing down does not make you weak. Sometimes it takes an even stronger person to walk away.

(Love) - You will be better off expressing your problems to your lover, rather than holding them in for the sake of not arguing. There's nothing like making up.

Virgo (August 23 - September 22)

Try to stay passionate about your work. It's almost over and then you will have all the time you need to handle your errands and have quality time at home with yourself. Do not rush anything that requires your time. If you do, you will only have to redo it.

(Love) - You have a funny feeling every time your sweetie comes around. You can't help but be happy and smile and want to tell the world. Only problem is you're scared. Don't be; tell your sweetie just how you feel.

Libra (September 23 - October 22)

If you are feeling trapped in whatever you are going through, try to delegate responsibility to someone else and sneak out. A little time to enjoy yourself is always better than walking around angry at the world.

(Love) - If you are feeling bored in your relationship, try something new. Go on a date to a place you wouldn't normally go, watch a movie you wouldn't normally watch, or do something so amazing they will brag for a week.

Scorpio (October 23 - November 21)

You go to school and work every day. Your daily routine is growing very boring to you. So try taking an exercising class, plan a mini vacation, go pamper yourself. Do something that will make your daily routine seem out of the ordinary.

(Love) - If you are giving 70% in the relationship and your sweetie is only giving 30%. Stop taking control and let them see what 30% feels like. They will be sure to change that attitude and put in more work.

Sagittarius (November 22 - December 21)

You have seen better days. Life isn't completely bad, but it sure could be better. Put yourself in the position that you can only go up from your low. The sun is only one rain storm away. Think positive, get positive.

(Love) - Don't rush into anything with your sweetie. Love takes time, and so does getting to know someone. Remember lust looks a lot like love.

Capricorn (December 22 - January 19)

Though your options are plentiful, don't be so quick to overlook something you need that's right in front of your face. The grass is not always greener and more attention could bring sight to your faults.

(Love) - The winter chill may be just what you and your sweetie need to warm things up in your relationship. So light up the fireplace and cuddle up to a nice movie.
