

# Her Curlz R Badd

By Dalecia Carr

## Wash and Go

Spring is finally here!

Flowers are blooming and pollen is on the move! Since the weather is warming up, we can wear our hair in an easy style such as the "Wash and Go".

This hairstyle can be done throughout the year, but some prefer to wear it this way in the warmer months because of the wet styling. When heading out to the beach or the pool you can easily wet your hair and put any type of gel or conditioner in it to define the curl.

Remember, that products do not give you a curl pattern they simply define it.

To avoid shrinkage, stretching out the hair by blow-drying is an option. If you don't want to use any heat, try the banding method.

While preparing your hair for bed you can style your hair in a bun, or just put on a satin bonnet.

Another option is to sleep on a satin pillowcase to preserve your sexy and to prevent friction from causing breakage.

### What you will need

Leave-in  
Blow dryer  
Spray bottle with water  
wide-tooth comb  
Gel  
Essential oil  
Hair clip

A Dapper Word from Elgin

## TAILORED TO STYLE

By Elgin Marsh

There is no certain age requirement to be called a "true gentleman." That is why I chose to interview Chris Miller, a young educated male who is very active on FSU's campus. He considers himself to be a "mutt," meaning that he very versatile when it comes to his style. Having on sweatpants one day and then a suit and tie on the next, he is able to maintain a presentable look. A must have in his everyday wardrobe is his gold cross necklace and his cartoon dress socks. He also believes that a gentleman should respect himself first before anything and have a strong belief in God.

### DAPPER ALERT !!!!

Have you been looking for something to completely change the look of just an ordinary blazer? Go out and grab a lapel pin! Lapel pins are a BIG item in today's men's fashion.
