

Wong O'Neill finds tapes prepared for packaged learning program an effective instructional aid.

Learning Resource Center Supports Instructional Program

The LRC will again, during the school year 1971-72, be striving to carry out its main objective — to contribute to the realization of the objectives of Wayne Community College by acquiring, organizing, and making available books, periodicals, and other materials needed to support the instructional program of the college and the community's educational needs. For the first time, beginning with fall quarter, the materials of all three areas of the LRC are catalogued by the Library of Congress classification. Due to a federal grant WCC is the first in the North Carolina community college system to accomplish this.

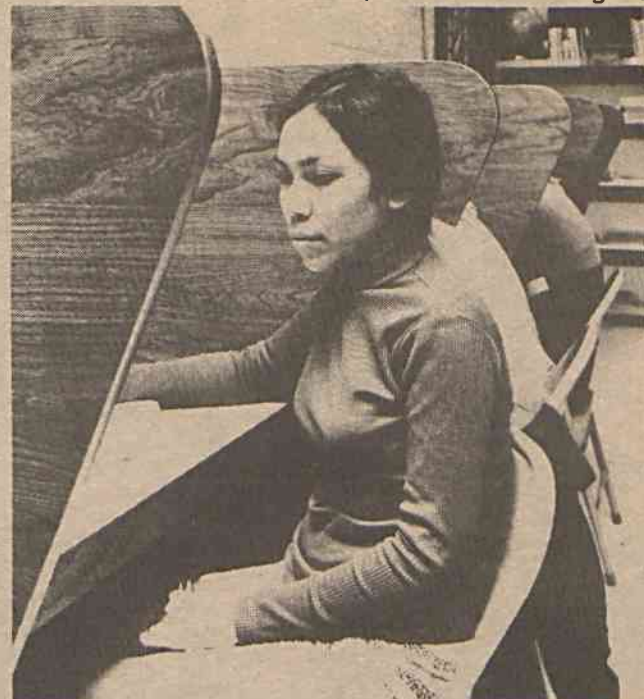

In June Mrs. Scottie W. Cox was appointed director of the LRC to fill the vacancy left by the resignation of Mrs. Mildred Council. Mrs. Cox will direct the overall program of the LRC with direct supervision of the media and graphics area.

The services of the library will be directed by Mrs. Doris Elledge, reference and circulation librarian, and Miss Susan Mixon who will be in charge of acquisitions and cataloging. This is Miss Mixon's first year at Wayne Community College. She received her Library Science degree from Appalachian State University and has completed 39 quarter hours of graduate work. Technical services of the library are supervised by Mrs. Helen Smith, secretary. The library will be open three

Sundays this quarter from 1:00 P.M. to 5:00 P.M. The dates are September 26, October 24, and November 21.

The staff of the Directed Studies Area under the direction of Mrs. Elizabeth Vinson encourages all students to make extensive use of the facility. Many innovative programs have been added especially for the curriculum students. Any student who feels that supplementary study would be helpful may contact Mrs. Vinson or Mrs. Mary Hopkins, Co-ordinator and Mrs. Ann Collier, secretary, to have the problem analyzed and programmed instruction planned. Some students may enjoy interest programs. Good American Diction, Black Heritage, American and British Literature (records), Poetry (tapes), and Living History are a few examples. The area may be effectively used for preparatory study. Students, who anticipate difficulty with a subject may come to Directed Studies and arrange for pre-study.

The services of the technical staff of the media department—Mr. Jerry Kirby, media technician, Mrs. Ruth Bailey, printing technician, and Mrs. Joann Paul, secretary — are available to the faculty, staff, students and community Monday through Friday from 7:45 a.m. - 5:00 p.m. These services include photographic production, graphic production, audio production and circulation of audio visual materials and equipment.

Study Carels in the LRC provide students like Maria Glenn ideal conditions for quiet study.

Individualized Instruction Initiated In Some Departments

This fall the Liberal Arts and Social Science Departments will offer several courses in the form of package learning programs. These programs combining text books, manuals and tapes will allow the student to proceed at his own pace.

For example, American History I taught by Mr. Richard Mahaney, Chairman of the Social Studies Department, will consist of three hours of classroom sessions and two hours of taped lectures.

The tapes will be available

at all times at the Learning Resource Center to aid the student in taking notes and to permit him to hear the lecture as often as he wishes. He will then refer to the end-of-chapter test in his manual for completion of each unit.

The concept of programming and packaging is not a new one. As applied today, it provides the slow learner with the same opportunity as the fast learner, thus removing classroom competition. However, ultimately the success or failure of the program is up to the student.

Bet You Didn't Know

The following is a selected summary of activities, happenings, and stuff that has not been published lately concerning the instructors and departments at Wayne Community College.

The Aviation Department has been visited by the FAA and received final certification for the operation of the aviation maintenance technology program as required by new FAA regulations. WCC was the third school in the Southeastern region to satisfy these regulations and the first school to meet the requirements on the first attempt.

In the Agriculture and

Natural Resources Department, Dr. Terry Humphries, VPI, has joined the Fish and Wildlife program. George Pettigrew took graduate courses at Virginia Tech. and Frank Casey participated in the physics program at ECU. The best Christmas present of all is a new bus which should be delivered about that time.

Business Department

In the Business Department, Mr. Neal has threatened to become Dr. Neal. Mrs. Nancy Bell has been taking graduate courses and Mrs. Anne Waters was awarded her master's; both at ECU. Mrs. Joan Spermo will join the department to teach business law and ad-

ministration courses. A graduate of American University, Mrs. Spermo came to Goldsboro as a result of her husband's assignment to Seymour Johnson Air Force Base. A second instructor is to join the staff prior to opening of classes.

Dental Occupations

In Dental Occupations, Dr. Sproul and Pat Griffith are to be joined by Mrs. Betty Scott and Mrs. Charlotte Berry in September and another hygiene instructor in December. Mrs. Scott joins DO from Chapel Hill where she assisted in development of research projects at the Dental School. Mrs. Berry returns after being in school at Chapel Hill in the Dental Auxiliary Teacher Education Program. By January, Mrs. Berry will have completed requirements for her B.S. Degree and assume the Dental Hygiene coordinator's position. Mrs. Gayle Davis replaces Mrs. Meredith Singley who transferred to Omaha, Nebraska. The Assistant's Banding and Graduation was a first that almost became a last, but Dr. Archer arrived in the nick of time to save the day.

In the Engineering Department, Ed Whyte's mustache is the most newsworthy item and may be the only happening printable. Mrs. Betty Froehlich had a daughter July 14. Mr. Bobby Parnell will join the Auto-Diesel staff for the Fall Quarter.

Advancement Studies Program

The Advancement Studies Program had the most advances. Director Al Strohm announced the addition of Miss Bonnie Peedin as a reading instructor. Miss Peedin operated the Reading Lab at ECU last year. Miriam Shue and Conrad Wessell, III became Mr. and Mrs. August 21. After working for two years in developing individualized instructional materials for math classes, Mr. Wessell is experiencing "Directed" studies.

Mr. James Bennett and Mr. William Horner will operate an expanded physical education program this year with increased emphasis upon intramurals. They will share responsibility for the College's athletic teams in basketball, golf, and tennis. Mr. Horner has completed requirements for his master's degree in Physical Education at UNC-CH.

Liberal Arts Department

The Liberal Arts Department had a most active summer. Everyone is pleased to have Mrs. June Wharton back at work after an illness this summer which slowed her down a few days. Mrs. Anne Fields joins the staff to teach art full-time after teaching part-time last year. Mr. Ollie Cox joins the English faculty from Fayetteville State University. Mr. Cox is a graduate of Johnson C. Smith University and has his

master's from State University of Iowa. Mr. Tom Jackson comes from ECU to the English Department with work experience for the Wildlife Commission in Raleigh. Mrs. Linda Hopkins, master's from Appalachian, comes from Columbia, South Carolina where her husband was working for "Uncle." Mrs. Eleanor Powell had foot surgery, but everything seems to have turned out o.k. Mrs. Ruth Boyer has been working on her thesis at State U. this summer. Mrs. Beatrice Balkum was a summer student in English at ECU. Mrs. Nell Reid experienced Major British Writers for real on site.

Math Department

The Math Department has added Mrs. Pamela Lawrence and Mrs. Shirley Raper to their department full time. Dr. Ron Taylor, Ph.D., Duke, will teach chemistry and Mr. Douglass Royall, master's ECU, will teach biology in the science department. In the

Social Studies Department, Mrs. Alice Reed has been teaching Western Civ. since June. Mr. Dan Hopkins, master's ASU, will teach psychology. Mrs. Darlene Van Laan, an intern in the MACT program at UNC-CH, will teach psychology in the Fall Quarter. Mr. Mahaney has American History packaged after using seven different tape recorders and the department will offer Pol 101 this Fall as a new course developed by Mr. Robert Rawl.

Nursing

The ADN program will operate from E-60 directed by Mrs. Bessie Hendrixson. Mrs. Patsy Johnson and Mrs. Jean Dickson will be instructors, also. Mrs. Johnson taught in the Nursing School at Chapel Hill where she graduated and Mrs. Dickson taught in the LPN program this summer while Mrs. Froehlich was on maternity leave. Mrs. Dickson is a graduate of Greensboro College.

Relevance.

While you're at WCC McDonald's is more relevant to your everyday life than anywhere else you can eat.
