

Month Celebrated

continued from page 15

According to recent news reports, older people, 65-plus, are the fastest growing age group comprising only 2% of the population.

This age group has increased and is still increasing.

From 1980 to 1990, the 65-plus group increased 32%.

In the same time period those 85 years old and older increased 56%.

Because of the rising numbers of older citizens, there is a large amount of enrollment by older people looking for job opportunities for the remainder of their possible working years.

The Geriatrics Program is designed to train people of all ages to work with the aging or disabled or both.
