Larry Martinez, front, and Bicno Francisco, workers with Landscape Design, install sprinklers outside the A&A building.

Next projects include paving new road

New buildings need finishing touches only

By REGGIE SWINSON

The new buildings, A&A and A&H, still have finishing details to be completed, according to Linwood Anderson, Vice President of Educational Support Services.

"The air conditioning boxes have some leaks but will soon be repaired; otherwise, all is well."

One addition to campus is 6 benches, 2 in the colonnade between A&M and MSS buildings, 2 on the first level outside of Hocutt, and 1 each at the first level of A&A and A&H.

The benches were purchased with profits from Bookstore sales.

Anderson said the next projects will not include buildings but additional parking lots, a road paved from the back of campus out to New Hope Road, and work to make the other Wayne Memorial Drive entrance look like the main entrance.

Anderson said, "At the last Board of Trustees meeting, the Board approved the architects for the road paving project. I am working on the aerial survey now, and we hope actual paving will begin this summer."
