### AIDS Seminar

from p. 8

According to Josa Raynor, Communicable Disease Program Manager, counties like Mecklenburg and Guilford have higher incidences of AIDS than Wayne, but "It is still the leading cause of death in Wayne County for ages 25-39," she said.

Statistics from the North Carolina HIV/STD Surveillance Report indicated that in 1997 Wayne reported 22 persons with HIV, in 1998, 22, and from January through September 1999, 18 cases of HIV

Atkins explained the ways HIV spreads from person to person. He added that the main transmitter of the HIV virus is heterosexual rather than homosexual sex or sharing of needles, razors, and tooth brushes.

AIDS infects a person's DNA, making the disease hard to cure. About eight million people in the United States are infected with AIDS or HIV.
