

air conditioning, and many other industrial and mechanical skills. The Dairyman's Association in Allegheny County have requested the Poultry and Livestock program to be offered in Sparta. The Applied Science Department eagerly granted this request by scheduling courses that include everything from livestock feeding to computerized farm management.

The development of a new program is nearing completion. This unique curriculum will be the only one of its kind anywhere. This Design/Build curriculum will respond to a new concept in home building and home ownership. Skills and knowledge of horticulture and building construction will be learned. Course topics of this program will include landscape design, plant materials, electrical wiring, plumbing, construction materials, welding, and blueprint reading and drafting.

The Human Services Department has a new instructor, Wes Scroggs. Wes has the responsibility of being the lead instructor in the Criminal Justice Curriculum, coordinating the certification to area law enforcement agencies, and director of campus security. The Hotel-Restaurant and Food Service students will expand their activities to provide the delicious lunches and dinners served in the Walker Community Center. This is an excellent opportunity for the students to apply their skills to a live situation in a first class setting. The Human Services Department will begin the second offering of the Dental Auxillary Certificate Program. The demand for this unique program was so great that several students were unable to enroll. These dental students will be learning their skills on newly acquired dental chairs and equipment.

The Human Services Department consists of Hotel-Restaurant Management, Foodservice Management, Foodservice Specialities, Criminal Justice and Protective Service Technology, Social Services, Postal Services, Early Childhood Education, Cosmetology, Dental Auxillary Assistance, Nursing Education Options and Physical Education.

hope you will enjoy the challenges that awaits you here.

The Mathematics and Science Department has ten full-time instructors, a department Chairperson, and a full-time secretary.

They are: Ms. Kate Anthony Mathematics; Mr. Ed Curtis, Mathematics; Mr. Charles Earp, Mathematics and Physics; Mr. Phil Funderburk, Electronics; Mrs. Betsy Klinkosum, Biology; Dr. Jim Knox, Biology; Mr. Pete Petrie, Computer Science and Mathematics; Dr. Al Stanley, Radio Television; Mr. Jacob (Buck) Stewart, Chemistry and Physics; Mr. Robert Walker, Chemistry and Physics.

The departmental chairperson is Dr. Jo Hendrix and the secretary is Mrs. Wanda Smith. Our offices are located in Hayes Hall, second floor.

The Mathematics Department will be offering a new course this fall in the science area. Astronomy will be taught for the first time by Charles Earp. He will have a class on Tuesday nights on campus and one Thursday night, in Sparta.

Mr. Pete Petrie has joined the full-time faculty group. Previously, he has taught in the department as a part-time instructor. He comes to the College from Hickory, NC where he taught at Fred T. Ford High School.

Again, we say welcome to the campus. We expect you to rise to the challenges that lie ahead, and we, the faculty and staff in this department will provide you the opportunities to excel. If you have questions, or if we can assist you in anyway, please feel free to stop by the department. The best of success to you during your studies at WCC.

Staff Profile

Wanda C. Smith has been a secretary at Wilkes Community College for 10 years. She has worked in Student Services, Business Department, for the Dean of Curriculum Programs, Human Services, and is currently working in the Mathematics and Science Department. Wanda is from Wilkes County originally.

Wanda received her Associate of Applied Science in Secretarial Science from Wilkes Community College and her Bachelor of Technology degree from Appalachian State University. She is married to Ricky W. Smith who is employed by Ryder Truck Rental, Inc. in North Wilkesboro. They have been married for a year and are looking forward to children in the future.

Wanda has stayed exceptionally busy this past year in trying to get things accomplished. She is learning how to put things on a personal computer. In her spare time Wanda enjoys tennis, water skiing, reading, and stock car racing.

Criminal Justice/Protective Services Curriculum

Today's law enforcement officers must be knowledgeable in many different areas if they are to function effectively in a complex society. They must be: 1) able to deal with individuals on all levels of society, 2) skilled in most operational techniques, and 3) able to act in legal matters requiring trained law personnel and split second decisions.

It is the intent of the two-year Criminal Justice/Protective Services Curriculum to develop proficiency in both incoming high school students and in-service law enforcement personnel. Both theoretical and practical instruction are offered to meet the requirements of various law enforcement agencies and to provide the student with knowledge, skills and attitudes to be effective law enforcement officers.

With an increasing demand for properly educated/trained law enforcement officers in federal, state and local government, as well as private industry, those who meet the demand will find challenging opportunities and advancement.

Applied Science Department Hotel-Restaurant Management, Food Service Management, Food Service Specialists

Wanted: Artistic, bright, creative dedicated, energetic, hardworking individuals for training in the hospitality industry. If you possess any or all of these traits, please see Bob Johnston in the Technical Arts Building, Room 700.

The hospitality field has a wealth of diversity to offer from management to the culinary arts. In a recent study by the Division of Occupational Outlook of the Bureau of Labor Statistics, food service was listed as one of the six most rapidly expanding fields in the country.

Training to enter this field can be acquired at Wilkes Community

College, either in a one - or two-year program. Students in these programs are given every opportunity to develop their skills and to expand their horizons.

In the one-year diploma program for Food Service Specialists, students receive hands on training in a modern kitchen-laboratory as well as classes in business skills applicable to their field of study. They are provided with on-campus experiences in the preparation and serving of domestic and international cuisines. This experience also includes serving small groups and banquet work as well as working in a dinner-theater atmosphere.

Those students now training in the hospitality field at WCC are most fortunate that their talents and skills can be showcased in the newly opened John A. Walker Community Center.

Credits from the one-year program can be transferred to the two year programs - Food Service Management and Hotel-Restaurant Management.

Food Service Management students prepare for supervisory and management positions which emphasis on food preparation, efficient utilization of staff and equipment. Business skills applicable to the food service industry and the supervision and management of personnel are also stressed in classroom sessions.

Graduates of the Hotel-Restaurant Management program are prepared for positions as supervisory and management personnel in motels, hotels, restaurants and clubs. They can anticipate a variety of employment opportunities in the national and international urban and resort centers.

Not all the learning experiences are in the classroom or lab, students are encouraged and given every assistance in entering competitions. Recently WCC students brought back to campus silver and bronze medals from the North Carolina Culinary Salon, which was sponsored by the North Carolina Restaurant Association. There are also field trips to food suppliers and purveyors to acquaint students with the purchasing aspects of their chosen fields.

Students are also given the opportunity to join the Foothills Chapter of the American Culinary Federation.

Bookstore News

Welcome Back Freshmen and Welcome Back Sophomores!!! It's been a long, hot summer without you, and we in the Bookstore are glad you're here.

We have all of your required and suggested books and supplies in stock and we are ready to help you with them. Our hours are from 9:00 a.m. until 3:00 p.m. and from 5:00 p.m. until 7:00 p.m. except Friday evenings.

When you pay for your textbooks in the Bookstore you will receive a CASH RECEIPT. Be sure to keep this receipt in a safe place until you know that all of the books are the right ones and the ones you will need for your classes.

With this receipt you may exchange any book or get a full cash refund if books are unmarked. This refund policy is good for the first two weeks of classes. This gives you an opportunity to exchange books for courses that you may change or ones that you may drop.

We have a buy-back policy here at WCC. The last week in each quarter, we buy back all of the text books that are going to continue to be used on our campus. We buy them back at one-half of the original price. You may purchase used books at three fourths of the original price.

If you have a scholarship, you may charge your books in the Bookstore with a permission slip from the Business Office. You will have three weeks to take care of your charges.

We not only have required materials in the Bookstore, but we have a lot of fun "things" too. We have beautiful back-packs to carry it all in. You will find greeting cards to send back home, sweaters, jackets and shirts to dress you up, down, or whatever, all kinds of goodies - candies, health snacks, chips, and gum. If you need a special gift, we will help you with that too. This is YOUR bookstore and we want you to feel right at home when you come in. We are looking forward to knowing you, so come in and give us that privilege.

Betty Thompson, Bookstore Mgr.

Colonial Journalism Workshop

On Sunday, August 5, 1984, three members of the yearbook staff and their advisor left at 6:00 in the morning for Williamsburg, Virginia, for a journalism workshop.

Time was spent in classes on layouts, copywriting and graphics. While at Williamsburg, Chuck Elledge, Renee Hayes, and Angela Royal learned the latest in good journalism ideas including how to do the total yearbook on a computer. Not only did the group attend classes and work on assignments, but they also had an opportunity to visit Colonial Williamsburg and Busch Gardens. All arrived back at the college on Thursday at 9:00 p.m. filled with knowledge and enthusiasm.

Join the yearbook and newspaper staff and be a part of recording the history of you at WCC this year.

"Star Gazers"

This Fall, on Tuesday nights, an Astronomy class will be taught at Wilkes Community College. It will be a lecture-lab type class where students will become familiar with the sky and the telescope. The planets, stars, metors, comets and galaxies will be studied.

The class will be limited to 15 people, so register early. The class

will run from 6:00 p.m. until 9:00 p.m. each Tuesday.

The College has purchased twelve powerful student telescopes with stands and one large telescope, for more detailed study for this class.

With Halley's Comet on its way toward the orbit around the sun, much interest has developed with watching the arrival of the comet in view with the telescopes.
