DEPARTMENT NOTES

Biology Class Visits Mill Pond

Thirty embryo biologists did investigational work at Hamburg Mill pond last Wednesday. The work consisted primarily of form indentification, and oxygen content determination of water.

Library Being Renovated.

The library is undergoing its fall cleaning under Miss Ricks' efficient direction.

Miss Ricks Attends Conference.

Miss Ricks attended the library conference at N. C. C. W. last Friday. She reports an interesting meeting and the discussion of such subjects as library service for negroes, an index of happenings of historical interest to the state, to be taken from newspapers; libraries for public schools. It was resolved that a minimum fee of one dollar per capita would be necessary for the maintenance of a library in any community.

Mrs. Hayden at Chapel.

Mrs. Hayden, the county health nurse, led chapel Monday morning, in preparation for the annual Red Cross roll call. The Home Economics students worked with Mr. Hayden last year in the Health Crusade.

Classes Employ Project Method

The class in Home Problems has finished housecleaning, and are be-

ginning laundry, with practical work in wool and silk.

The class in Cookery I, is making estimations of the caloric requirements for persons of various occupations.

Cookery No. 2 has finished practical experiments with the thermometer, determining the correct temperatures for cooking various foods. Both the candy and the oven thermometer were used.

PERSONALS

Ruth Ragsdale spent the week-end at her home in Madison.

Misses Lloyd Merriman, Mary Ragsdale and Margaret Armfield were the week-end guests of Luna Taylor at her home in Danbury.

Miss Nellie McSwain of N. C. C. W., Greensboro, was the week-end guest of Miss Gertrude Moore.

Nellie Chilton and Bertha Neal spent the week-end at their homes in Walnut Cove.

Pherlie Mae Siske, Hazel Coltrane and Margaret Smith spent the week-end at their homes.

Benbow Merriman spent the week-end in Danbury as the guest of Spot Taylor.

Misses Lalah Hassel, Mary Fogleman, Alta Hutson, Alma Stuart, Cordia and Annabel Thompson spent the week-end at their respective homes.

Mable McBane spent the week-end with Lena Meacham of Guilford College.

"WORD MONGERS" and "CHATTERING BARBERS"

"Word mongers" and "chattering barbers," Gilbert called those of his predecessors who asserted that a wound made by a magnetized needle was painless, that a magnet will attract silver, that the diamond will draw iron, that the magnet thirsts and dies in the absence of iron, that a magnet, pulverized and taken with sweetened water, will cure headaches and prevent fat.

Before Gilbert died in 1603, he had done much to explain magnetism and electricity through experiment. He found that by hammering iron held in a magnetic meridian it can be magnetized. He discovered that the compass needle is controlled by the earth's magnetism and that one magnet can remagnetize another that has lost its power. He noted the common electrical attraction of rubbed bodies, among them diamonds, as well as glass, crystals, and stones, and was the first to study electricity as a distinct force.

"Not in books, but in things themselves, look for knowledge," he shouted. This man helped to revolutionize methods of thinking—helped to make electricity what it has become. His fellow men were little concerned with him and his experiments. "Will Queen Elizabeth marry—and whom?" they were asking.

Elizabeth's flirtations mean little to us. Gilbert's method means much. It is the method that has made modern electricity what it has become, the method which enabled the Research Laboratories of the General Electric Company to discover new electrical principles now applied in transmitting power for hundreds of miles, in lighting homes electrically, in aiding physicians with the X-rays, in freeing civilization from drudgery.
