PARAGRAPHS

Nobody read the last issue of the GUILFORDIAN and we are very sorry.

Extra copies of this disgusting edition will be mailed anywhere in the U. S. for 5c, which covers cost of printing, wrapping, and postage.

And now somebody has shown how above-board they are by writing anonymous letters, offering suggestions about the running of the college. Advice is usually welcomed by the wise but when the adviser is ashamed of his advice why should it be recognized?

We contend that the design on the ring should not be changed. It is so distinctive, original, and beautiful; only Elon and Salem have the same design. Then, too, so many of the incoming freshmen every year admire the rings and the present senior class is just tickled pink with both the looks and quality.

The present system of not posting cuts or notifying the student of an absence credited against him is an injustice when there is the liability of a mistake on the part of the administration. The student knows nothing of the cut until it is too late to prove that he was present. It was suggested that a list of those getting cuts during the week be posted every Saturday.

We have greatly appreciated the co-operation of the students in mentioning the GUILFORDIAN when on a purchasing campaign in Greensboro. Don't forget that if it were not for the backing of these merchants of Greensboro we would not be able to put out a Yellow Fever Edition or even one that mentioned student government or literary fraternities. Read the GUILFORDIAN and Quaker ads and trade with our backers. If you have to purchase somewhere else, tell the merchant that he should advertise in the GUILFORDIAN.

Vandalism?

We hardly know whether to call the recent imitation warfare with bags of water and garbage cans vandalism or just an outburst, or bust, or restrained energy.

The epidemic of rolling, roaring and banging trash cans tumbling down stairways seems to be spasmodic and in vogue at infrequent intervals. The same can be said of the water-throwing.

The only evil, as we see it, is in the destruction of property. If college men still enjoy a siege of horseplay as a form of divertimento and it hurts no property then there seems to be no harm entailed. If they want to cover the ground in front of the dormitories with paper bags, aquatic contents, and clean up the mess, then settle down to sanity, what is the harm! Energy has to be liberated, so if no other way can be found to expend it, just turn back about ten years and throw bags of water and then come back to the present and clean up the mess you have made in the nursery.

When a bunch of men get together with no outlet for energy except the pursuit of a good time they always have need for long ears. Take for example a Shriners' convention.

Very few of the participants of the recent atrocities would intentionally destroy property. Their aim is to make a big noise and have a large time. The problem, then, seems to be in the direction of energy. We suggest a better athletic system and occasional study.

But think what you are doing before you do it, and try to save the furniture and buildings.

The campus has been greatly beautified by the erection of iron light poles to replace the old gnarled posts along the walks. A white way is being constructed in front of Founders as the gift of the senior class. Slowly the campus is coming into the beauty that has always been here—but marred by thoughtless supervision and occasional neglect. At the present rate of improvement we will have the most beautiful campus in the state. But perhaps if the grass was mown it would look even better.

A THOUGHT FOR TODAY

Supposin' fish don't bit at first --
What are you goin' to do?
Throw down your pole, and chuck your bait

And say your fishin's through?
You bet you ain't—you're goin' to fish,
'N fish, 'n fish, 'n wait
Until you ketch a basketful,
'N used, up all your bait.

Suppose success don't come at first--
What are you goin' to do?
Throw up the sponge 'n kick yourself
'N growl and fret and stew?

You bet you ain't—you're goin' to fish,
You'll bait 'n bait ag'in,
Until success just grabs your hook
For grit is sure to win.

—Exchange.

A woodpecker lit on a freshman's head
And settled down to drill.
He drilled away for half a day,
Then finally broke his bill.

—The Technician, N. C. State

Jenny: Joe, why did you park here when there are so many nicer places farther on?

Joe: But, Jen, this is love at first site.

YOUNG PHYSICISTS ARE CONSTRUCTING RADIOS

Students Are Intensely Interested in Lectures and Laboratory Experiments

The Physics I class has been spending their time in the past month upon the study of radio. The class voted to pay one dollar each and purchase the necessary parts for three one-tube radio sets, which will be donated to the laboratory. The college also bought materials for three. These sets are being assembled during the laboratory periods. The class is divided into six groups each under the leadership of an "expert" who directs the assembling and planning of the sets.

The class periods are used for lectures upon the various instruments used in the set. Most of these lectures are accompanied by demonstrations of the workings of the instruments under discussion. For instance, two days were taken on the subject of induction and the place of induction coils in a receiving set circuit.

Professor Cole demonstrated the effect of an induced current upon an open core transformer and a primary coil. Then he demonstrated the added effect upon a galvanometer of the placing of an iron core inside the coil.

Another period was spent upon vacuum tubes, their construction and operation. This proved to be very interesting as the forerunners of the modern three-element tube were explained and diagrams of these were drawn on the blackboard.

The groups are doing intensive study of radios and the courses are quite to their liking in that they are learning just how a radio is put together and the whys of the construction.

At present there are three sets finished due to the ambitious desire of the various boys in the groups. They have worked faithfully at night to complete the sets and as soon as they were finished they were tested out. The first set, assembled by Scott Parker and his group, picked up Jacksonville, Florida, and Batavia, Illinois, fifteen minutes after the last joint was soldered. The second set was constructed by Justice Strickland, and the third by George Yelverton and Stanley Moore. So far they have picked up Florida, South Carolina, Illinois, New York, North Carolina, and Pennsylvania.

The class as a whole is intensely interested in the innovation to finish up their year's work in physics.

The assistant instructors in the radio work are Scott Parker, Pat Stuart, Howard Trivette, Orlin Newlin, and Turner Moon. The class intends to conduct a few experiments along the line of aerials regarding their lengths and positions in order to obtain the best results.

QUAKERS WIN ONE OUT OF FOUR GAMES IN WEEK TRIP

(Continued from Page One)

The game with Roanoke was rained out and the Quantico Marines were next encountered. They had played 15 games and lost only one. These games were played with some of the best college teams in the country. But Guilford opened up with a powerful offensive and slammed out a victory over this team.

The Quakers scored four runs in the first inning on three bases on balls, one two-base hit and an error. In the fifth inning Bailes, star moundsman of the Marines, was driven from the mound and the Marines used two others during the game.

Rabb was on the mound for Guilford and he breezed them by in fine style until the fifth inning when Captain Freeny hit a terrific home run with two men on bases. Rabb pitched good ball throughout the game. His curve ball was breaking nicely and his fast ball had a hop on it like a graveyard rabbit on a frosty night. However, errors kept him in hot water a greater part of the time and were largely responsible for a greater part of the

runs scored against him. Taylor got a beautiful three-base hit, while Hendrickson got a double and a single. The score ended 11-10.

The next game was played with Georgetown University by the score of four to two. Coltrane pitched a fine game, allowing nine scattered hits and striking out eleven batters. Two misjudged fly balls went for home runs in the first inning. One of the balls should have been an easy out, while the other should have been held to a single.

	R. H. E.
Guilford	2 4 3
Georgetown	4 9 0

Batteries: Coltrane and Neece; Georgetown, Gillespie and Phelan. The following day the William and Mary game was rained out and the Guilford team stayed until the next day. Rabb pitched a good game for Guilford, but errors lost the game. The score was 7-5 and should have been 5-2 in favor of Guilford. Guilford breezed along without scoring until the eighth inning when they batted around and scored five runs. In this inning Taylor, William and Mary pitcher, was removed from the box and Wallace relieved him. In this inning hits by Griffin, Marshall, Parrish, Hendrickson, and Neece, coupled with a base on balls and a hit batter accounted for five runs. However, the early lead piled up by William and Mary was too much and could not be overcome.

	R. H. E.
Guilford	5 7 3
William and Mary	7 7 1

Batteries, Guilford, Rabb and Neece; William and Mary, E. Taylor, Wallace and Dalton.

ROLVIX HARLAN WILL DELIVER GRADUATING ADDRESS THIS YEAR

(Continued from Page One)

problems. *A New Day for the Country Church* is one of his books.

Dr. Elbert Russell, well known professor of Old Testament Interpretation, Duke University, will be the speaker at the baccalaureate service on Sunday morning, 11 o'clock, at the Friends meeting house. Many of the students and faculty are acquainted with Dr. Russell and will welcome him to the college campus.

The address before the Christian Associations will be made by Prof. Samuel L. Haworth, head of the local department of Religious Education.

The program follows:

SATURDAY, JUNE 4

3 p. m., Alumni reception on campus.
6 p. m., Alumni dinner.
7:30 p. m., Alumni business meeting.

SUNDAY, JUNE 5

11:00 a. m., Baccalaureate service, Dr. Elbert Russell, Duke University.
8:00 p. m., Address before the Christian associations, Prof. Samuel Haworth, Guilford College.

MONDAY, JUNE 6

10:30 a. m., Class gift and class play.
2:00 p. m., Meeting of the board of trustees.
8:00 p. m., Annual recital of the Music Department.

TUESDAY, JUNE 7

10 a. m., Commencement exercises. Conferring of degrees.
Baccalaureate address, Dr. Rolvix Harlan, Department of Sociology and Social Ethics, University of Richmond.
