NUMBER 2

Shakespeare's Three Tabards

The initial program of the Guilford College Arts-Entertainment Series will be "The Three Tabards of Shakespeare."

Philip Lawrence, distinguished Shakespearean authority, director and actor, will head a cast of five performers in selections from the great tragedies, comedies and histories in The Three Tabards of Shakespeare, a theatre event to be presented on the local campus in Dana Auditorium on Friday, October 7 at 8:00 p.m. The company, touring under the auspices of the Association of American Colleges' Arts Program, will perform on nearly twenty-five campuses in several states. Mr. Lawrence's four fellow actors are all experienced players with many diversified roles to their credit.

The production by Richard Herd takes its name from the tabards (tunics) worn by the heralds of noble families on which were emblazoned their lords' coats of arms. In the performance to be presented here, these tabards are identified with various human emotions which Shakespeare so brilliantly portrayed.

Scenes in The Three Tabards of Shakespeare are selected from Hamlet, Twelfth Night, Macbeth,

Friends World Conference

The summer months of 1967 will be certain to see an unusual amount of activity here on campus. From July 24th to August 3rd over 1200 Quaker leaders throughout the world will gather here to consider all aspects of Quakerism.

The Clerk, or presiding officer of the conference, will be Lewis E. Waddilove of the London Yearly Meeting of the Religious Society of Friends. Mr. Waddilove, an officer of the Order of the British Empire, is a director of the Joseph Rowntree Memorial Trust, an organization founded in 1947 to raise the standards of workers' housing in England and Wales. He received his degree in Public Administration from London University. He is also a member of the British Colonial Star Chamber Secretariat. During the blitz of 1940-1941, Waddilove did evacuation work in London and Plymouth. Joining the Friends Ambulance Unit in 1942, he served in Europe and the Middle East. He is currently involved in several programs concerned with housing, immigrants and education. In 1965, he was honored by Queen Elizabeth.

Assisting Waddilove will be Thomas Lung'ho Administrative Secretary of the East Africa Yearly Meeting of Friends, and Barrett Hollister, Director of International

Taming of the Shrew, Henry V and Julius Caesar. The staging is deliberately simple to permit concentration on the players and tabards. Music is provided by a lutenist who sings appropriate madrigals and ballads. The narrative, written by Mr. Lawrence, accentuates the emotional climate of each scene.

Where Is WGCR?

During the school year 1964-1965 a group of students became interested in starting a radio station at Guilford College. After formulating the ideas for this station, WGCR came on the air. The station had a power of one watt and covered the first two floors of the New Men's Dorm. As the idea of a radio station was discussed further by this group of students, it was decided that WGCR should be licensed by the Federal Communications Commission, operated on the high fidelity F.M. band, and it should play popular, semi-classical, and classical music throughout its broadcast day.

During the school year 1965-66 a constitution was drawn up for WGCR. The station was to operate within the structure of the Fine Music Broadcasting Society. This organization was to be composed of students who were interested in presenting good music to Guilford College students, and the Guilford College community.

You probably wonder why part of this article has been written in the past tense? (WHAT HAS HAPPENED TO WGCR?) The final step in getting WGCR on the air lies with the Board of Trustees of this college. We need their approval before WGCR can be licensed (Continued on page 3, col. 1)

Studies at Antioch College, Yellow Springs, Ohio, and Secretary of the Friends General Conference, to which eight American Yearly Meetings of Friends belong.

Final details for the 1967 World Conference will be worked out when twenty American and European members of the Conference Executive Committee meet in Greensboro this October. Edward B. Bronner, professor of history at Haverford College, Pennsylvania, will preside. Arrangements for this meeting are being made by J. Floyd Moore, professor of religion and Biblical Literature at Guilford College and Executive Secretary of the World Conference.

The theme of the conference is "Seek, Find, Share; The Time Is the Present." For ten days, those attending will engage in vigorous and prayerful self-examination of their roles in a world of profound change.

Librarians Get Dynamic Duo

With the beginning of this school year two new services are being offered by the college library. On September 15th the library installed a new type copying machine for the use of the faculty and students of Guilford College.

The new copier, a Xerox 914, is located in the entry alcove on the north side of the library. The copier is a self-service unit and is coin-operated at a charge of 10c per copy. Herbert Poole, the Director of Libraries, indicated that the new copier will be used on a trial basis for about three months. The decision to continue using the Xerox 914 will depend upon the volume of use made of it by fac-

ulty and students. There are no restrictions on types of materials that may be copied.

In announcing the new copying service, the Director of Libraries pointed out that the quality of reproduction made on the Xerox 914 is vastly superior to that of the 3M copier in use in the library since 1965. The Xerox 914 is also simpler than the 3M copier to operate, because it requires only one operation per copy versus the multiple steps required on the 3M machine.

Faculty and students requiring initial assistance in operating the Xerox copier will be given aid upon request at the circulation desk.

The library has also announced the opening of a typing room for faculty and student use. This new facility is provided without cost by the library which was able to acquire two used, but serviceable, typewriters during the summer.

The new typing room is on the second floor of the library building, in seminar room No. 3. Because the room will be locked except when in use, arrangements for a key to the room and for use of a typewriter may be made at the circulation desk. The typewriters may be used in the typing room only. Care and maintenance costs for normal use of the equipment will be borne by the library.

Hopeful

In commenting on the new service, Herbert Poole expressed the hope that the anticipated need for such service will be borne out by use of the typing room. Mr. Poole said also that Guilford College was fortunate to be able to provide a typing room, as many colleges and universities do not. "It has been my experience," he said, "that free typing facilities are a great aid to those preparing papers and reports." Should demands become great enough in the future, the number of typewriters might be increased.

New Program

The Guilford College Department of Admissions is interested in the addition of a new program which would solicit the help of the present student body. The plan calls for recommendation, by the Guilford students, of a person or persons from their high schools or hometowns who are the leaders of their class and would benefit by the Guilford College experience. Upon recommendation, the department will send your choice an application for Guilford, as well as other pertinent information.

If you have a friend who is in the senior class of his high school, and is outstanding in his academic and leadership abilities, then drop by the admissions office and put in a recommendation for him.

This is part of the expanded admissions program which hopes to not only raise the academic standards of Guilford, but also give the superior student a chance to learn formally about your school.

ANNOUNCEMENT

On Saturday, October 8th, there will be a dance featuring The Monzas. The dance has been arranged by the Social Committee of the Student Legislature. The admission to the Founder's Basement dance will be 50c per person, stag or drag. The dance begins at 8:00 and lasts until 12:00. We urge each and everyone of you to attend.

Guilford Tour Guide

Students interested in going to Europe will have a chance to do so this summer. For ten years a Seminar Abroad program has been in effect at Guilford College. The man responsible for this is Mr. Claude Shotts, Director of Counseling and faculty advisor for the International Relations Club. Mr. Shotts feels that intercultural experience is dynamic for everyone involved.

Mr. Shotts first went to Europe in 1946 on postwar relief work in Germany. There he helped the American Friends in the feeding and general rehabilitation of war victims. He returned in 1948 to plan and administrate a Seminar for forty students from nine countries, noting how much the students enjoyed and benefitted from their group discussions on their own cultures.

In 1953, when again returning from a trip abroad, Mr. Shotts was surprised to hear unfavorable comments from American tourists on their way home. These tourists complained of being "robbed and exploited" by American tourist agencies which charged expensive rates for uninteresting and unorganized tours of Europe. During discussions with some students at the University of North Carolina who had also been on these European tours, Mr. Shotts decided to take a trip to Europe by himself. He spent several years perfecting his project. He and his first group left for Europe in 1958.

This first group used a bus for its touring and traveling, but this was found to be too time-consuming. Travel by plane has been employed for the last four or five years. While this is a bit more expensive, it gives the students more time to see all the things they want to see.

The tour, which lasts from the middle of June until the middle of August, includes such places as Brussels, Cologne, Amsterdam, Paris, Switzerland, Florence, Rome, Athens, Belgrade, Budapest, Vienna, Prague, Berlin, Copenhagen, and London. A week is spent in four of the more important cities, with stops in the other varying from three to five days.

Mr. Shotts stresses the value of such a serious, important, and educational experience. "Education is

learning to live successfully in the world. The best way to do this is through exposure to other cultures. This has become increasingly important with the improved transit facilities. Now we live in a world society; we hope to make it a world community."

Interested students are encouraged to see Mr. Shotts. He is accepting applications now for this summer's trip. More information will be available at an assembly on October 24. At this program, some of the Guilford students who went last year will speak to the student body. Mr. Shotts will also be present to answer any questions.

Bryden Gets Grant

BY EMILY HEDRICK

Within the year, King Hall will be taking on an entirely new personality. It will have been renovated into primarily a science building when completed. Inside the building will be a new feature to the science departments — an ultra-modern research laboratory equipped by money granted by two branches of the U.S. Government.

Dr. Robert R. Bryden, head of Guilford's Biology Department, announces that approval has been made for a grant of approximately \$40,000 from the Health, Education, and Welfare Department. Moreover, another federal agency, the National Science Foundation, has made a grant of \$3,700, which is to be matched by the college.

These sums are to be utilized to improve and to update the existing facilities of the Biology, Physics, and Chemistry Departments of Guilford College. It is hoped that the laboratories will give about 15 students yearly an opportunity to do undergraduate research here. Also, materials such as high-power microscopes, instruments for metabolism study, and visual aids will be available for use by individual students.

The two monetary grants will enable the Guilford science department to do what was before impossible. The equipment, which is now on order, will be housed properly in the to-be-remodeled King Hall.
