

Fall Break Announcement

CONTRIBUTION

Fall Break begins at close of day on Friday, October 15. The residence halls will close at 4:00 p.m. on Friday, October 15, and will not reopen until 1:00 p.m. on Sunday, October 24.

All students will have to vacate the residence halls by 4:00 p.m. However, those students who have classes, lab, etc., will be allowed to remain until after their classes are over and will be given sufficient time to pack. These students should report this situation to the coordinator.

Before leaving for break each student is to make sure that the following items have been done:

- Room clean and in good order.
- Waste baskets are empty.
- No perishable food left in room.
- All electrical appliances disconnected.
- Windows and doors are locked.

Anyone failing to comply with the above will be subject to a fine of up to \$15.00. Members of the Housing Staff will be checking each room to insure compliance.

While the college will provide security coverage during break, the college cannot assume liability for any losses. Therefore it is recommended that you take your valuables with you when you leave.

Take care and have a good break!

New Pottery Class

A Handbuilding Pottery class is being offered through the Craft Center. The class will be on Fridays, 1:30 - 4:30, October 29 to December 12. The cost is \$10.00 plus materials. If you are interested, please contact Barbara MacInnes, 855 - 0771. If the response is such that a second class is needed, please indicate a good time for you.

Young Democrats on Campus

BY
FRAN HENDERSON

Have college students lost their vim and verve? Can college students still have sizeable political clout in an election year? The Guilford College Young Democrats Club is working to expel the myth that political apathy is rampant on college campuses. Boasting an enthusiastic membership of over twenty-five and growing, the club has already sponsored a successful voter registration drive.

The club, led by President John Richardson, has exciting

plans for this year. The group will be actively campaigning for Democratic candidates on the national, state, and local levels in the November elections. Members of the club will work as volunteers at the downtown Democratic Headquarters. There are tentative plans to bring politicians to the Guilford campus for speeches and seminars.

After the fervor of the November elections dies down, the Young Democrats will continue to work for increased political awareness on campus. President Richardson hopes to assemble a political internship

resource library for those interested in internships with organizations or senators. Another voter registration drive will be held in the spring.

On October 6th, the Young Democrats met to elect officers. They are John Richardson, President; Sandell Froelicher, Vice-President; Frances Henderson, Secretary; and Doug Hasty, Treasurer.

Anyone interested in joining the club should watch for announcements of the meetings or contact one of the officers.

Planetarium Performance

CONTRIBUTION

The Morehead Planetarium's fall double feature *Technicolor Sky* and *What Do You Think Pythagoras*, is a rich combination of the beauties and the mathematics of the universe. Auroras, fireballs, and eclipses which appear in program "A" are some of the visual elements juxtaposed to the magic numbers, musical intervals, and rhythmic x-ray bursts from unknown stars that support the theme of program "B".

Technicolor Sky invites us to look more closely at the sky and it awakens our sensibilities to a variety of spectacular events from familiar phenomena like sunsets, comets and shooting stars, to more infrequent sights like sundogs, zodiacal light and the gegenschein or counter glow.

"Really, most people think of the skies in black and white

terms, which is only natural," said Jim Manning, Senior Planetarium Intern and production supervisor of the show. "But as we look deeper into space, our telescope photography reveals intense color we just can't see with the naked eye. One might also be surprised to learn that rainbows are round and that thunderstorms might be caused by sunspots."

In contrast to the visual richness of *Technicolor Sky* is the effect of stark mathematical reality in *What Do You Think, Pythagoras?*

As it explores the quest for order central to the development of western civilization, "Pythagoras" relates the clarity, precision, and fascination for opposites, like hot and cold, light and dark, that characterize the world vision of early Greek philosophers.

The show is haunted by the fleeting image of Pythagoras, the forerunner of giants like Plato, Copernicus, and Kepler. Father of a mathematical view of the universe, Pythagoras epitomized the Greek virtues of order and tranquility. His discovery of the mathematical foundations of music opened

a world of exploration into what the Greeks considered their highest art form.

What Do You Think Pythagoras illustrates the Greeks' mental construction of the idea that the planets, stars, and other heavenly bodies move in perfect harmonic relationships, and this "music of the spheres," although never heard was a solid but incorrect belief which lasted for 2,000 years. And yet, Pythagoras' belief in a fire at the center of the universe is something only recently discovered to be basically correct.

The double feature can be seen without reservation for single admission rates Mondays through Fridays at 8:00 p.m.; Saturdays at 11:00 a.m., 1:00, 3:00 and 8:00 p.m. (11:00 a.m., 5:00 and 8:00 p.m. on Home Football Saturdays); and Sundays at 2:00, 3:00 and 8:00 p.m.

Admission rates are \$1.00 for children through age 11, \$1.25 for students through college and senior citizens, and \$1.50 for other adults.

Free scientific and art exhibits may be seen before and after each Planetarium performance.

S H O C K
shock
SHOCKING!

Provisional grades of second semester 1976-77 and provisional grades of 1976 summer school become final unless they are updated by Oct. 13, 1976, according to the Registrars Office.

Faculty Photos

Faculty who wish to pose for their pictures for this years Quaker may come to the office on the second floor of Founders Hall, weekdays during October between the hours of 11:30 and 5:00 p.m.

Faculty not photographed during this time will be subject to the usual unannounced intrusions of photographers during the rest of the year.

Personals

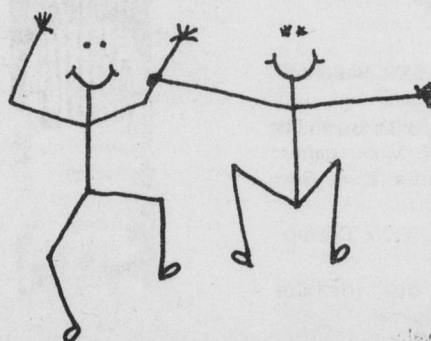

The shipment has arrived. V. Jones.

Do you know who who you are: I love you, I need you, I want you! Sincerely love and kisses, Wally.

People who send anonymous notes ought to reveal themselves.

Happy Birthday (late), Blair!
RB -- How about Atlanta?!

From the Typesetter — Have a Happy Break!!

Tuesday's Film

The film, *Johnny Got His Gun* will again be shown tonight at 8:15 in Sternberger Auditorium. Based on Dalton

Trumbo's book of the same name, the movie is a shocking statement against war and man's inhumanity to other men.
