#### Pfeiffer wins finale

#### Basketball season ends

The season came to a merciful end recently for the Quaker Men's basketball team as Guilford was soundly beaten 91-62 in the Carolinas Conference tournament. The team lost to No. 2-seated Pfeiffer, the team which eventually won the tournament and the team which had only beaten the Quakers by a total of five points in two previous meetings. But this time Pfeiffer was simply too much to handle, taking a 38-28 halftime lead and stretching the lead to 30 points at one time during the second half.

Guilford shot poorly, (42% as opposed to Pfeiffer's 56%) and as a result lost control of the game quickly as the opponents made eight of their first ten shots. Guilford's zone proved to be extremely ineffective and and one Pfeiffer player scored 20 points alone against it in the first half; two more than Guilford's first half total.

On the other end of the court, Pfeiffer employed a 1-3-1 zone defense that significantly contributed to the Quaker's poor shooting. They were unable to get the ball inside and therefore were forced to take low percentage outside shots which failed to fall. Then, the team found it difficult to come up with a rebound to attempt another shot as they were outrebounded 40-32.

Leading scorers for the Quakers were Ben Barrett with 15 points, Keith King, 13, and Jerry Greenwood, 12. Dan Ogbourn, seldom used during the season, had a team leading 6 rebounds.

Coach Jack Jenson seemed to be happy it was all over after the game when we vowed, "I won't be here tomorrow night, you can be assured of that."

Although the team finished with records at 6-20 overall and 3-11 in conference action, there were a few bright spots and a tirad of disappointments. Junior guard Barrett had a standout season as a scorer playmaker, defender, and leader as well as combining with freshman Greenwood to form an admirable backcourt, definitely the teams strong point. Freshman King and Chris Lambert both improved vastly as the season progressed and all four will return as the nucleus of next years team.

Forced to play from the start of the season, the freshman gained a great deal of experience quickly. After losing by 30 in the season's first game, over half the team's games were decided by less than 6 points. If Coach Jenson is able to recruit a few big men to take the pressure off of King down low, the young team may be ready to win the close ones. They already know what it's like to lose, hopefully next year they will learn what it's like

Athletic Puzzle: third in a series

## Women's sports at Guilford

By Bruce Teachey

The Athletic Department at Guilford College is composed of more than just men's athletics. In the haste of trying to mention or get across my point in the previous article, I neglected to say anything about the women's athletic program. I

apologize for this mistake as it was not intentional, just an oversight.

The women's athletic program is very remarkable when one takes into account the fact that not much publicity is given to them and primarily that men's athletics seem to always overshadow women's athletics. However, women's athletics is growing across the nation as well as at Guilford College. The beginning of a woman's lacrosse program is one example here at Guilford. The inspiration to achieve is very evident.

The women sports at Guilford, including volleyball, basketball, tennis, and softball, here have budgets of below \$3000. Once again, these figures do not begin to cover the costs that are

necessary. With a lack of publicity, it is simply a wonder that these sports are even off the ground or even competing at a respectible rate. Yet, these sports do compete, along with all men's athletics, even at the expense of cutting budget expenditures to compensate for the lack of funds.

The women's athletic department has really accomplished a great deal. Mention of championships in the 60's can be updated by the fact that the 1981 women's tennis team won the NAIA National Championship. In fact, in 1981 Guilford had four female All-Americans and two honorable mentions. Over the past seven years, women's sports continue to recruit all-state selections that contribute a great deal to the program. These achievements were complished with a visible budget that is simply depleted.

More articles will follow concerning the state of the athletic department, for this article I would like to pay special thanks to Coach Gayle Currie for making me more aware of the women's athletic program.

# Why not study in San Francisco?

San Francisco is soaring bridges and shimmering bay water. San Francisco is a modern city, with a rich diversity of ethnic heritages, tied together with turn-of-the-century cable cars. For many years the "City by the Bay" has enjoyed unequalled popularity as the most attractive, most civilized, most desirable city in the country. It has been characterized as the "city of infinite possibilities." But beneath the romance lie all the challenging problems of our urban societies.

"EAST IS EAST AND WEST IS SAN FRANCISCO"

-Jack London

You are invited to spend the first three weeks of your summer vacation savoring the richness of San Francisco and studying its life. You will be pioneering a new concept in off-campus summer studies, one designed to expand the highly successful format of the Fall & Spring Break programs while offering a domestic alternative to overseas study. This should also leave enough time for gainful summer employment beginning June 1st.

LEADERSHIP: Jim Keith,

who is Director of Experimental Learning and Adjunct Professor of Sociology at Guilford, knows San Francisco well. He will lead the group back to the City where he spent the last eight years as Associate Professor Urban Studies and Director of the Westmont College San Francisco-based Urban Program. If you have not met Jim Keith this year, come by the Student Services offices, second floor Founders, for a visit.

COURSE & PROGRAM: SOCIOLOGY 250 "URBAN ISSUES"

The course will treat San Francisco both as a rewarding subject of study and as a valuable resource center. We will learn to live in the city environment, becoming familiar with its modes of transportation, its media, neighborhoods, the arts and

recreation, and its libraries. We will study the city's colorful history & geography, and investigate such current issues as refugee relocation, poverty, the elderly, education, lifestyle variations, health care, redevelopment, housing, penal system, and ethnic communities. These urban issues will be dealt with in seminars, field assignments, readings, and so forth. You will also be expected to devise and conduct an intensive field-oriented project on a

specific selected topic, such as the Russian Community, Central American refugees, or historic preservation. The course will carry either 3 or 4 academic credits, depending on the outcome of the review the Curriculum Committee is presently conducting.

# Buy a SILVER- ODSSEY

T-Shirt for \$6.75 and Receive \$8.00 worth of coupon's good at the Guilford College PIZZA HUT. Good Through April.

### Volunteers needed

The American Friends Service Committee and the Mexican Friends Service committee will be sharing several volunteer community service projects in Mexico during the summer of 1982. These projects are for a period of seven weeks - end of June to mid-August. Participants will be between 18 and 26 years of ago and must be able to converse comfortably in Spanish. The units will be located in rural villages; approximately half the participants in each unit will be from Latin America.

Four to six co-leaders for these projects will be recruited from the U.S. Persons interested and potentially qualified with fluent Spanish, some experience working with young people, and preferably some exposure to Latin America, would be welcome to inquire. Write to Carol Tuttle, Personnel Department, AFSC, 1501 Cherry Street, Philadelphia, Pennsylvania 19102. Cyrus Johnson. 208 Archdale, will be glad to talk further with anyone.
