

# Horoscopes

by, Loony Lana Lunar

## PISCES

What would you do if your horoscope was not here on this page that you are reading at this very moment? Granted, I know that they are not altogether true, but what would you do? If you said that you would do nothing then, get involved, baby! If you said you would do something, then you have the power to go far on any cloud.

## ARIES

A trauma has hit you hard! Take control, all is not lost. You have plenty of time to get it all together. Think about other things that are due soon, then you will be able to fully concentrate on it.

## TAURUS

Now is a time for waiting, whether it is waiting on a grade, a graduate school, or a boy. I know that this is hard since spring makes us impatient, but things will be settled soon and then you can lay in the sun.

## GEMINI

Take a gander at yourself. You beg for attention and cannot get enough of it. When will you realize that you don't need all the questionable looks from other people. Alcohol is enough to support anyone's idea about you.

## CANCER

How much money do you really have? You are going into complete financial debt, and at the perfect time with IRS coming up and summer around the corner. All those plans may have to take a by-pass or sell some of your possessions.

## VIRGO

This past weekend for you was a nonstop party. Also, the next couple of weekends will be the same. Either you have to calm down or leave your studying to 24 hours from Sunday to Thursday. Watch for unexpected duties, though.

## LEO

Confused, whipped, or just all together flabbergasted are perfect adjectives to describe your "luv" for another. Take hold of yourself and try Lamas. First, you have to be yourself and truthful to this beau, before you could ever be happy.

## SCORPIO

Your creative talents are being rerouted into a project that is not worth your time or efforts. Try to complete it as quickly as you can, so that you can get down to some fun stuff. Realize that you can accomplish anything on your own no matter how big.

## LIBRA

You could be in for a couple of bad weeks. You better either stay in bed or tunnel a hole for you to hide inside. There may be one good event, but this will not balance out enough.

## SAGITTARIUS

Take that dead fish off your face. Don't be so sad. Do something off the wall, like ask that boy you have been thinking about to IRS. Yes, either you barely know him or you have known him for some time but, you haven't talked to him in a while. Do it because chances are that you will have the time of your life.

## CAPRICORN

You have a lot on your mind, and it is not school work. You are trying to figure out your summer plans, and school is not even out. Everything will work out if you just be patient. Get your mind on school or your options may come down to summer school.

## AQUARIUS

What do ya' know? Your song is playing on the radio as I write this. It looks like love rules the stars for you this time; it came to me through radio waves. Sit back and have fun. Don't get too serious because you'll be out of school soon.

## IRS WEEKEND
