

BAILEY MAKES LOWEST PER CENT OF ABSENCES

CAFETERIA SERVES OVER THREE THOUSAND

Three thousand and five hundred hot lunches were served last month to Bailey High School students by the school cafeteria. Most of this number were "dished out" plate lunches and soup. Around one-third of the lunches were given to under-privileged or under-weight children in the grammar grades. Mrs. Murray, head of the cafeteria, reports a considerable increase in those being served since long schedules have been resumed.

WHOLESOME MEALS SERVED

An effort is being made to serve light and wholesome meals during the hot weather with more rounded meals being planned for the winter.

Very little profit is being made in the lunch room, but the small sum that is made each month is immediately turned back into equipment for the cafeteria, as no money from the lunch room can be used for anything else.

AMUSEMENTS NETS \$34.50 FOR P. T. A.

Total receipts collected from the rides sponsored by the P.T.A. of Bailey during the week of October 5-12 amounted to \$85.20.

Expenses, including cleaning of lot, rent, state tax, and light bill, totaled \$50.75.

Profits were \$34.50 with which the P.T.A. is planning to settle outstanding bills.

COMMERCIAL STUDENT OFFERED JOB AT ELON

LERON RAY, one of the commercial students at Bailey High School, has received an opportunity to earn next year part of his college tuition at Elon college. He will have to finish the commercial course that he is now taking and will be required to type between forty and fifty words a minute and take dictation at the rate of seventy-five or eighty words per minute.

He will probably be employed in one of the professors offices.

862 ABSENCES MADE FIRST MONTH

A total of 862 absences was reported last month in the Bailey School. High school students made 202 of these absences, an average of ten students out every day, making an average attendance of 94% in high school. Contrary to usual attendance records the boys averaged 95%, the girls only 93%.

In the grammar grades 660 absences were recorded, or an average of 33 absences per day, a percentage of ninety.

DECREASE IN TEACHERS

Mr. Walker stated that for every 34 students a new teacher could be gained. It can be seen that at the present rate of absences the grammar grades stand to lose a teacher. From all reports the average attendance of 890 was the lowest in the county.

Mr. Walker further reported that the Spring Hope elementary grades, composed principally of rural children, coming as the Bailey students do from tobacco and cotton farms averaged last month 94% attendance, a 5% increase over Bailey High School.
