

### Pile Up The Scrap

If they can just reach the top stair with that heavy load of scrap iron. They did! Now, Having reached the top, the two rather tired students put down their load and rest a minute before they proceed on their journey to make some home room teacher beam and say, "Good for you! Our room won't be the black sheep in the scrap iron drive."

Somebody else is happy about it too. A very well known gentleman, America's favorite, Uncle Sam. When Uncle Sam sees the school students bringing in scrap iron, he has visions of how those new tanks, guns, helmets, and just loads of other things made from scrap iron will look to the Germans and Japs.

Why, anybody can help Uncle Sam and America's fighting forces out that much!
