The type of English you use brands you. This has always been true and will continue to be.

The victor in the present war must be the Allies. That victory will be ours in the near future is not assured, however, if we resort to man power and equipment alone. To hasten the end we must employ other requisites of war--courage, the will to win and to produce, and willingness to sacrifice anything essential to the war effort.

After all, working on the school paper is more important in life's training than playing basket ball, if a choice has to be made.

Five minutes give each student plenty of time to change classes, and anyone late without a good excuse should not resent punishment.

The first year in school is the time to start developing the spirit of cooperation so essential in later years.

Shall We Have Student Gov't?

On the theory that a person can be led but not driven shouldn't some step be undertaken toward organizing student government in Bailey High School? It is quite natural that a student is more willing to follow set rules if he knows that a student council elected by the student body has a hand in the making of regulations that present the students' point of view.

The federal government's legislative and judicial bodies are built on the foundation of government of the people, by the people, and for the people.

This form extends to the states, the counties, and the cities. Shouldn't it extend to every school?

For this is where young America receives its training to continue the principles of American democracy.

The star that led the Wise Men to the Saviour continues to shine and beckon men to follow that Saviour whose life exemplified faith and hope and love and forgiveness. Humanity needs again this Christmas to follow its beams to the manger of Christ and worship there anew, proclaiming once more the chorus, Glory to God in the highest, and on earth, PEACE, good will to men.

Group-Studying Profitable

In groups the high school students study together during study hall. Of what value is this to the students?

It can be helpful or useless just as the students wish. If everyone contributes to the studying, it can be helpful; but if one person does all the thinking and explaining, the others are developing the parasitic habit.

Contributions by the entire group, however, can mean better preparation by all and time saved at night.

I wish to express my appreciation to all students for their cooperative spirit shown me during the absence of Mrs. Lassiter. Especially do I commend the conduct displayed in class and the preparation of assignments made. *C. Finch*
