

# Sixth Grade Charts Interests Of Members

After filling out individual questionnaires the sixth grade made a summary chart of its experiences and interests.

The vote went for play as the favorite past time, Flying Dutchman is the favorite game. Ten children have mothers and fathers who play with them.

Funny Books and Smiling Jack comic strip still hold the crown in the reading world.

### FAVORITE PET

The dog takes first place in the field of pets; the cat, second. Stamps and airplanes are collected more than any other objects except metals for Uncle Sam.

Only one sixth of the class are buying war bonds.

Most of the pupils go to Sunday school, but only a small per cent are members of any church.

The roll call of the 4H Club and Boy Scout organization will include most of the names.

By rising at seven and retiring at ten the class finds or takes time for movies twice a week. War pictures are favorites.

Home making and aviation are the chief interests for later years.

The girls are afraid of snakes and spiders, but, of course, the boys are not afraid.

## State Requires Health Course For Grade

Requirements of the new health course taken by the ninth grade are that they meet outdoors three days weekly for physical education and have class work the other two days in their textbook, HEALTH AND HUMAN WELFARE.

During the physical education period each week, they play soft ball, dodge ball, and relays; while in their basic studying so far, stories of Pasteur, Koch, and Major Walter Reed have been stressed principally.
