

# PRINCIPAL'S COLUMN Nash Schools To Have Health Service

## Bond Drive Continues; Sales At Post Office

The schools of Nash County will receive a distinct service when the School-Health Coordinating Service visits us between Oct. 25 and Dec. 21. This program was inaugurated in 1939 and since then the staff of trained workers has been able to visit about 5 school systems per year.

### PURPOSE

The purpose of the School-Health Coordinating Service is to develop better practices and better teaching of health and physical education. Due to the fact that so many young men called for the armed forces have been rejected, the problem is acute.

### SUBJECTS

The subjects to be considered in the program are: 1. Health Service. 2. Health Instruction. 3. Healthful School Living. 4. Nutrition. 5. Physical Education.

Health Service includes screening and a determination of the defects of the students. The teachers will be instructed in just how to know if a child is well or sick. In doing this a check will be made on height, weight, eyes, hair, skin, nose, throat, and about ten other items. Home visits

will also be a part of the health service program.

Health Instruction includes personal hygiene and safety and health habits.

Healthful School Living is the part that most vitally concerns each of us. In this program we are to consider the cleanliness and general appearance of the rooms, halls, toilets, and grounds.

### NUTRITION

Nutrition is the fourth item for discussion. The leaders will instruct in nutrition problems of children, proper lunchroom diets and practices, and local dietary needs.

In the Physical Education program, consideration will be given to organization, methods, and materials in the Physical Education program.

I would like to urge all parents, teachers and students to get ready for the visits to be made by the Coordinating Staff.

"Keep the Axis on the run" is the slogan of the Bailey community as it continues to buy War bonds.

In support of the third bond drive, the citizens of Bailey have purchased twenty-six thousand dollars worth of bonds and are still buying.

"If you have not bought your share, do it now; so that Hitler's day of confinement and our day of peace will be closer," requests the committee. Purchases may be made at the post office.
