

Why I Like Ag. (CONTINUED FROM PG. 26)

I took part in the project story and public speaking contest in the local chapter. I attended every chapter meeting.

I have learned principles of soldering, tin works, and acetylene welding besides plumbing and electricity.

I like my project work because my farm practice program consists of two acres of tobacco, one sow, and one and one half acres of corn. This year I hope to meet the Carolina Farmer degree.

I am sure that I have learned many useful things and that our shop work as a whole has been worth while to me.

Some Good Practices

1. Get machinery repaired and keep in good condition.
2. Plant proved varieties of seeds.
3. Use recommended amounts of fertilizers.
4. Feed balanced rations to all livestock.

BOYS ATTEND FEDERATION MEETING

Attending the Nash county Federation of Future Farmers as judges from the Bailey Chapter at Red Oak, March 24, were Linwood Vick, J. C. Lamm, Thelbert Glover, and Hubert Earp. Joe High represented Bailey in the Future demonstration lecturing contest; Jerome Vick attended as reporter.

Spring Hope was placed first in both contests. After the contests a barbecue supper was served.

Public Speaking

Thirty-two Future Farmers of the Bailey Chapter met for public speaking the first week in April. Each member prepared a speech not to exceed 10 minutes in length on an agricultural topic. The speeches were given in class and the one speaking the best was chosen to represent the chapter in the Federation Contest.
