

HOME ECONOMICS

IMPORTANCE OF HOME EC.

Although some people think nothing practical is taught in home economics, the subject is just as important as any other subject taken by a high school girl.

Above all home economics teaches the future home makers of America the importance of nutrition. Learning to cook meals including the basic seven, canning fruits, vegetables, and meats, and eating the right foods will help keep the future America strong and healthy.

ECONOMY

Needed now more than ever is the ability to be economical. That is the making over of old clothes, learning to buy the best quality of necessary new garments, and spending money the wisest way.

If girls do not learn this now while attending school, when will they have another opportunity? P.J.F.

Soldier Stockings Made

Christmas stockings for service men are being made by tenth grade home economics girls.

Girls Serve Banquet For Fathers And Sons

About eighty fathers and sons attended the Father-Son Banquet given in the club house December 5.

The supper included barbecue, slaw, creamed potatoes, bread, coffee, ice cream, and cookies. This was prepared by the tenth grade home economics girls. Before supper a program was presented by some of the agriculture members.

The house was decorated with yellow and blue paper, F.F.A. colors, with some holly.

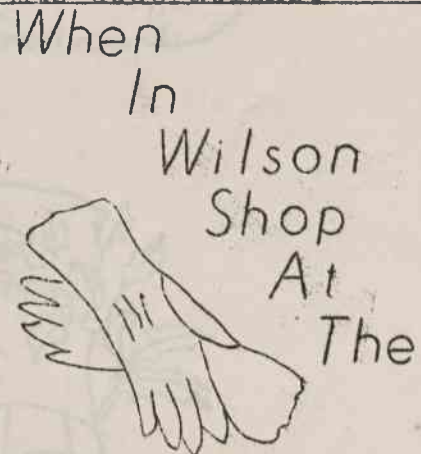

Club Prepares Boxes

Packages for soldiers in the hospital and for local needed people are to be prepared by ninth grade home ec. club girls.

GIRLS MAKE GIFTS TO SAVE MONEY

That money spent ordinarily for Christmas gifts might be used for a better purpose, the tenth grade girls have been making gifts in the department for the past days.

Gifts made were knitted belts, handkerchiefs, dish towels, and embroidered scarfs and dresser sets. Practically all the girls made something requiring embroidery. Next week the girls plan to study Christmas decorations.
