CONSIDERED Best-all-round Student in math 8 is DOROTHY JCYNER; math 9, JOHN GLOVER; biology 10, KEITH GLOVER; and ag. 11, LINWOOD VICK.

HONOR ROLL

Octavia Beard
Jackie Lois Edwards
Jacqueline Collie
Bobby Glover
Making honor roll except for absences are
Mary Evelyn Glover
John Glover
Molba J. Stott

Seniors Study Macbeth From Different Angles

Following up their study of Shakespeare, the background and general structure of his plays, and the theaters in which they appeared, the seniors have made a study of Macbeth.

By means of outlining, comparing characters, weighing one against the other, and memorizing the most outstanding parts of this play, both senior English classes have come to understand how the desire for too much power destroys a fine character.

OUTLINE

Detailed outlines and diagrams of the structural pattern of the play have consumed much of the time.

In addition, the classes have memorized important parts of the play and have written themes discussing phases of the play of the author's genius.

Dumbness Has Its Reward Hears All

m. Brown

If I could but talk, oh, what stories I could tell--supposed secrets and planned schemes--I know them all.

More than that, I am aware of the characteristics of almost every boy and girl in high school; and let me tell you if there's any truth in the old saying "Neatness and patience pays," my advice is less gossiping and grumbling and more neatness and patience.

Even though, I'm green (in color), I'm not entirely ignorant, and, take my word, I could do a pretty good job of helping the teachers with grades.
